## Proses Penentuan Topik Material [GRI 3-1, 3-2, 2-14] Process for Determining Material Topics

Bank Jatim secara berkala pada setiap tahunnya melakukan proses penentuan topik material melalui serangkaian tahapan yang meliputi kegiatan identifikasi dan analisis terhadap aktivitas operasional serta hubungan bisnis yang dijalankan, dengan tetap mempertimbangkan konteks keberlanjutan yang relevan. Selain itu, Bank Jatim juga melakukan kajian terhadap para pemangku kepentingan yang terpengaruh oleh kegiatan operasionalnya, baik ditinjau dari dampak yang dihasilkan oleh Bank terhadap para pemangku kepentingan (*inside out*) maupun dari sudut pandang pengaruh yang diberikan oleh para pemangku kepentingan terhadap kondisi serta kinerja Bank (*outside in*). Seluruh rangkaian proses tersebut dilaksanakan secara terintegrasi dan selaras dengan mekanisme identifikasi risiko yang diterapkan oleh Bank. Dalam pelaksanaan proses penentuan dan identifikasi risiko tersebut, Bank melibatkan berbagai unit kerja internal serta turut mengikutsertakan para pemangku kepentingan eksternal guna memperoleh pandangan yang lebih menyeluruh, sekaligus memastikan bahwa risiko yang diidentifikasi telah mempertimbangkan beragam perspektif yang relevan.

Dalam proses ini, Bank Jatim melakukan *Focus Group Discussion* (FGD) pada 19 Februari 2026 melalui media *zoom meeting* dengan melibatkan Divisi Corporate Secretary, Divisi Audit Internal, Divisi Human Capital, divisi Perencanaan Strategis & Manajemen Kinerja, Divisi Dana dan Jasa, Divisi Bisnis Syariah, Divisi Kredit Konsumer, Divisi Kredit Ritel, Divisi Kredit Mikro, Divisi Kredit Menengah, Korporasi & Sindikasi, Divisi Akuntansi dan Manajemen Keuangan, Divisi Kebijakan & Prosedur, Divisi Tresuri, Divisi Manajemen Anak Perusahaan, Divisi Manajemen Risiko, Divisi Analisis Risiko Kredit, Divisi Restrukturisasi dan Penyelesaian Kredit, Divisi Administrasi Kredit, Divisi Operasi, Divisi Umum, Divisi Teknologi Informasi, Divisi Chief Information Security Officer (CISO), Divisi Digital Banking, Divisi International Banking, Divisi Hubungan Kelembagaan, Divisi Distribusi Bisnis dan Service Excellent (DBSE), Divisi Kepatuhan & APU PPT PPP SPM, Divisi Hukum, Unit Pengembangan Jaringan, dan Divisi Unit Usaha Syariah.

Berdasarkan hasil pemahaman konteks keberlanjutan di tahap 1, kemudian Bank Jatim melakukan identifikasi atas dampak aktual dan potensial dari isu keberlanjutan, termasuk melakukan analisis dampak terhadap hak asasi manusia pada seluruh aktivitas dan hubungan bisnisnya. Tujuan dari identifikasi ini adalah untuk melakukan upaya mitigasi dampak yang mungkin terjadi. Dalam melakukan identifikasi dampak aktual dan potensial, Bank Jatim menggunakan berbagai dokumen seperti dokumen pengaduan nasabah serta hasil diskusi dengan *stakeholder* eksternal sehingga dapat membantu Bank menganalisis dampak yang akan terjadi.

Setelah mengidentifikasi dampak aktual dan potensial, Bank Jatim melakukan penilaian signifikansi dampak pada aktivitas dan relasi bisnisnya untuk menentukan tindakan yang tepat untuk mengatasi dampak dan menentukan topik material yang relevan akan dibahas dalam Laporan Keberlanjutan Bank tahun 2025.

Bank Jatim periodically performs the process of determining material topics through a series of stages that include the identification and analysis of its operational activities and business relationships, while still taking into account the relevant sustainability context. In addition, Bank Jatim also conducts an assessment of stakeholders affected by its operational activities, both in terms of the impact generated by the Bank on stakeholders (*inside-out*) and from the perspective of the influence exerted by stakeholders on the Bank's condition and performance, particularly with regard to financial materiality aspects (*outside-in*). The entire series of processes is conducted in an integrated manner and aligned with the Bank's risk identification mechanism. In implementing the risk determination and identification process, the Bank involves various internal work units and also engages external stakeholders to obtain a more comprehensive view, while ensuring that the identified risks have taken into account a wide range of relevant perspectives.

In this process, Bank Jatim conducted a Focus Group Discussion (FGD) on February 19, 2026 via zoom meeting media involving the Corporate Secretary Division, Internal Audit Division, Human Capital Division, Strategic Planning & Performance Management Division, Funds and Services Division, Sharia Business Division, Consumer Credit Division, Retail Credit Division, Medium-scale, Corporate & Syndication Credit Division, Accounting and Financial Management Division, Policies & Procedures Division, Treasury Division, Subsidiary Management Division, Risk Management Division, Credit Risk Analysis Division, Credit Restructuring and Settlement Division, Credit Administration Division, Operations Division, General Affairs Division, Information Technology Division, Chief Information Security Officer (CISO) Division, Digital Banking Division, International Banking Division, Institutional Relations Division, Business Distribution and Service Excellence (DBSE) Division, Compliance & APU PPT PPP SPM Division, Legal Division, Network Development Unit, and Sharia Business Unit Division.

Based on the results of the sustainability context assessment conducted in Stage 1, Bank Jatim subsequently identified the actual and potential impacts of sustainability-related issues, including conducting a human rights impact assessment across its business activities and business relationships. The objective of this identification process is to support the implementation of mitigation measures for impacts that may arise. In identifying actual and potential impacts, Bank Jatim uses various documents such as customer complaint documents, which can help the Bank analyze the impacts that will occur.

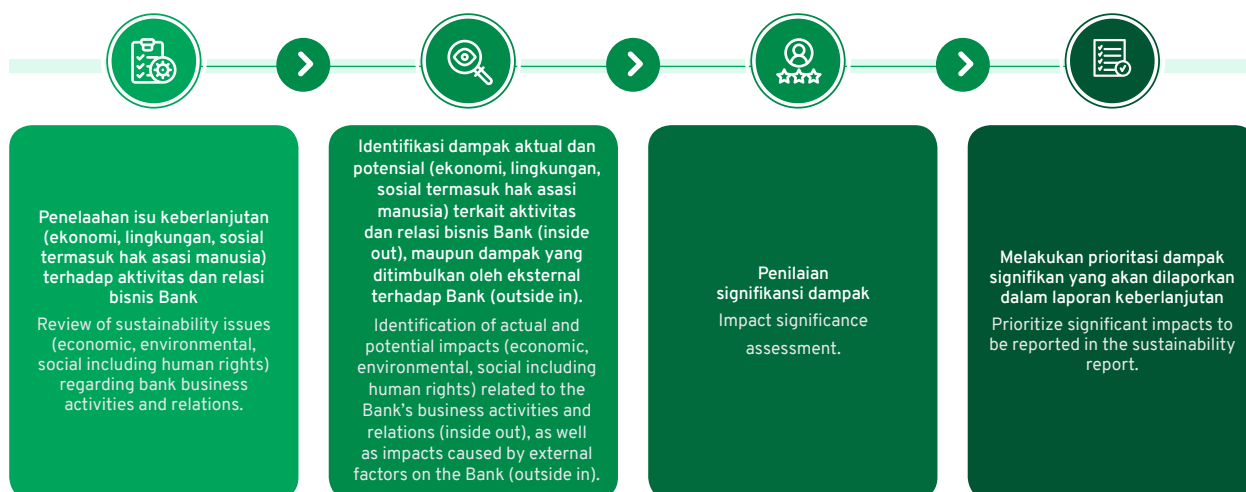

After identifying actual and potential impacts, Bank Jatim assessed the significance of such impacts arising from its business activities and business relationships. The assessment aimed to determine appropriate measures to manage and address these impacts, as well as to identify the material topics to be disclosed in the Bank's 2025 Sustainability Report.

Bank Jatim telah mengklasifikasikan dampak ke dalam kategori *high*, *moderate to high*, *moderate*, dan *low*.

Selanjutnya, pada tahap ini Bank Jatim memprioritaskan topik material berdasarkan tingkat signifikansinya yaitu pada tingkat *high*, *moderate to high*, dan *moderate*. Selanjutnya, Bank melakukan konfirmasi atas topik material yang diprioritaskan dalam tahap sebelumnya serta meminta masukan terkait topik material yang menjadi prioritas untuk disampaikan dalam Laporan Keberlanjutan Bank kepada pemangku kepentingan eksternal serta ahli/*expert* yang dilakukan melalui penyebaran kuesioner sejak 20 Februari sampai 5 Maret 2026. Masukan yang diberikan oleh pemangku kepentingan eksternal kemudian dipertimbangkan untuk diprioritaskan menjadi topik material tahun 2025. Terdapat 2 (dua) topik material yang disampaikan oleh pemangku kepentingan eksternal yang diputuskan untuk diangkat sebagai topik material tahun 2025 yaitu energi dan emisi. Adapun *stakeholder* eksternal yang telah memberikan masukan atas topik material yang terpilih oleh *stakeholder* internal meliputi Lembaga Swadaya Masyarakat (LSM), Regulator, Media Massa, dan ahli/*expert*. Berdasarkan masukan dari stakeholder eksternal dalam mengonfirmasi topik material terpilih, kemudian digunakan Bank Jatim dalam menetapkan usulan topik material kepada Direktur Utama yang akan dilaporkan dalam Laporan Keberlanjutan tahun 2025. Dalam melakukan pembahasan topik material bersama Direktur Utama, Bank Jatim senantiasa mempertimbangkan identifikasi risiko terkini dalam proses manajemen risiko Bank. Meskipun beberapa isu tidak diprioritaskan dalam laporan ini, Bank Jatim tetap melakukan evaluasi berkala terhadap seluruh isu yang relevan dengan bisnis dan pemangku kepentingan, untuk memastikan dinamika isu dan rasionalisasi keputusan pelaporan tercermin secara konsisten.

Topik material yang telah ditetapkan oleh Bank Jatim juga dijadikan pertimbangan Bank dalam perencanaan dan penyusunan program keberlanjutan untuk periode berjalan maupun periode berikutnya. Hal ini memastikan bahwa laporan keberlanjutan mencerminkan isu yang relevan dan menjadi pedoman nyata dalam pengelolaan risiko, strategi bisnis, dan pencapaian tujuan keberlanjutan.

Proses penentuan topik material telah melewati tahapan-tahapan yaitu:

Bank Jatim has classified the identified impacts into four categories: high, moderate to high, moderate, and low.

Subsequently, at this stage, Bank Jatim prioritizes material topics based on their level of significance, namely high, moderate to high, and moderate. The Bank then validates the prioritized material topics identified in the previous stage and seeks input regarding the priority material topics to be disclosed in the Bank's Sustainability Report from external stakeholders as well as experts, which is conducted through a questionnaire distribution from 20 February to 5 March 2026. The input provided by external stakeholders is then considered in determining the priority material topics for 2025. There are two (2) material topics raised by external stakeholders that have been decided to be included as material topics for 2025, namely energy and emissions. The external stakeholders who provided input on the material topics selected by internal stakeholders include Non-Governmental Organizations (NGOs), regulators, mass media, and experts. Based on feedback received from external stakeholders in confirming the selected material topics, Bank Jatim subsequently formulated and submitted the proposed material topics to the President Director for approval and inclusion in the 2025 Sustainability Report. In discussing and determining the material topics with the President Director, Bank Jatim consistently considers the latest risk identification results generated through the Bank's risk management process. Although certain topics have not been prioritized for disclosure in this report, Bank Jatim continues to conduct periodic evaluations of all issues relevant to its business operations and stakeholders to ensure that evolving sustainability issues and the rationale underlying reporting decisions are consistently monitored, assessed, and reflected in the reporting process.

The material topics identified by Bank Jatim are also taken into consideration in the planning and development of sustainability programs for both the current and subsequent periods. This ensures that the Sustainability Report reflects relevant issues and serves as a practical reference for risk management, business strategy, and the achievement of sustainability objectives.

### Kinerja Ekonomi

Sebagai bagian dari sektor jasa keuangan, Bank Jatim turut merasakan dampak positif dari pertumbuhan ekonomi Indonesia yang berkelanjutan. Hal ini tercermin dari tren peningkatan kinerja ekonomi yang disajikan dalam laporan keuangan tahun pelaporan, yang telah diaudit oleh Kantor Akuntan Publik. Peningkatan kinerja ini memungkinkan Bank Jatim memberikan kontribusi positif tidak hanya bagi seluruh pemangku kepentingannya, tetapi juga bagi pertumbuhan ekonomi di Provinsi Jawa Timur.

Dampak positif tersebut mencerminkan keberhasilan inisiatif dan kebijakan strategis yang ditetapkan Bank Jatim dalam mencapai target dan kinerja yang tercantum dalam Rencana Bisnis Bank (RBB) 2025. Penyusunan RBB didasarkan pada evaluasi kondisi perekonomian Indonesia sepanjang tahun 2024 serta prediksi dari berbagai lembaga nasional dan internasional yang menunjukkan optimisme terhadap pertumbuhan ekonomi di tahun tersebut.

Komitmen Bank Jatim dalam pengelolaan kinerja ekonomi tercermin dari pelaksanaan kebijakan dan inisiatif strategis yang konsisten sesuai Rencana Bisnis Bank (RBB) 2025. Selain itu, dalam memberikan dampak positif kepada pemangku kepentingan, Bank secara rutin melaksanakan kegiatan Tanggung Jawab Sosial dan Lingkungan (TJSL) sesuai Surat Keputusan Direksi No. 063/03/83/DIR/CSE/KEP tanggal 20 Mei 2024 tentang Standard Operating Procedure (SOP) Tanggung Jawab Sosial dan Lingkungan PT Bank Pembangunan Daerah Jawa Timur Tbk. Untuk memastikan dukungan dan kontribusi maksimal dari seluruh pegawai, manajemen secara berkala melakukan sosialisasi melalui berbagai kesempatan dan media komunikasi internal. Pengelolaan kinerja ekonomi berada di bawah tanggung jawab Divisi Akuntansi Manajemen dan Keuangan.

### Economic Performance

A part of the financial services sector, Bank Jatim has benefited from Indonesia's sustained economic growth. This is reflected in the upward trend in economic performance presented in its annual financial statements, which have been audited by a Public Accounting Firm. This improved performance enables Bank Jatim to make a positive contribution not only to all its stakeholders but also to economic growth in East Java Province.

The positive impact reflects the success of Bank Jatim's strategic initiatives and policies in achieving the targets and performance targets outlined in the 2025 Bank Business Plan (RBB). The RBB was prepared based on an evaluation of Indonesia's economic conditions throughout 2024 and predictions from various national and international institutions, which expressed optimism for economic growth in that year.

Bank Jatim's commitment to managing economic performance is reflected in the consistent implementation of strategic policies and initiatives in accordance with the 2025 Bank Business Plan (RBB). In addition, in delivering positive impacts to stakeholders, the Bank regularly implements Corporate Social and Environmental Responsibility (TJSL) activities in accordance with Board of Directors Decree No. 063/03/83/DIR/CSE/KEP dated May 20, 2024 regarding the Standard Operating Procedure (SOP) for Corporate Social and Environmental Responsibility of PT Bank Pembangunan Daerah Jawa Timur Tbk. To ensure maximum support and contribution from all employees, management regularly conducts outreach through various opportunities and internal communication channels. Economic performance management falls under the responsibility of the Management Accounting and Finance Division.

Namun demikian, peningkatan kinerja ekonomi berpotensi diikuti oleh peningkatan risiko kredit, terutama dalam kondisi ketidakpastian ekonomi. Oleh karenanya, Bank Jatim senantiasa melakukan penguatan manajemen risiko kredit, pengembangan sistem analisis kredit, serta pengelolaan portofolio pembiayaan.

Kinerja ekonomi Bank Jatim senantiasa dievaluasi efektivitasnya melalui ketercapaian RBB. RBB disampaikan oleh Bank Jatim kepada Otoritas Jasa Keuangan untuk mendapatkan masukan untuk diterapkan pada tahun yang akan datang. Selama tahun 2025, tidak terdapat dampak negatif terkait kinerja ekonomi yang dikelola oleh Bank maupun dalam hubungan bisnisnya.

## Anti Korupsi

Tindakan korupsi merupakan salah satu bentuk pelanggaran yang memberikan dampak aktual maupun potensial negatif yaitu menurunkan kepercayaan para pemangku kepentingan. Dampak negatif dari risiko korupsi terlihat dari terjadinya kasus *fraud* pada tahun 2025, yang berpotensi menurunkan kepercayaan pemangku kepentingan, merugikan secara finansial, dan menimbulkan risiko reputasi dan risiko operasional bagi Bank Jatim.

Bank Jatim senantiasa menjalankan langkah-langkah mitigasi dengan menyediakan sarana pengaduan *whistleblowing system* (WBS). Pemangku kepentingan dapat menyampaikan pengaduan tentang pelanggaran etika yang dilakukan insan Bank dengan datang langsung ke kantor pusat Bank Jatim, mengirimkan surat ke Divisi Audit Internal, melalui website <https://wbs.bankjatim.co.id>, atau melalui SMS/WhatsApp dan telepon ke nomor 081330003040 yang dikelola oleh Divisi Audit Internal. Bank Jatim berkomitmen melindungi keamanan dan kerahasiaan identitas pelapor yang menyampaikan laporan dengan itikad baik, sementara seluruh basis data dan informasi pengaduan berada di bawah pengelolaan dan tanggung jawab Divisi Audit Internal.

Dalam rangka mencegah terjadinya kasus-kasus penyimpangan operasional pada Bank, khususnya *fraud* yang dapat merugikan nasabah atau bank dan dikeluarkannya Peraturan Otoritas Jasa Keuangan No. 39/POJK.03/2019 tanggal 19 Desember 2019 tentang Penerapan Strategi *Anti fraud* Bagi Bank Umum maka diperlukan suatu peningkatan efektivitas pengendalian internal sebagai upaya meminimalkan risiko *fraud* termasuk menerapkan strategi anti *fraud*. Komitmen Bank Jatim Kebijakan Sistem Manajemen Anti Penyusapan dan SOP Strategi Anti Fraud 063/03/10/DIR/AUI/KEP 21 Februari 2024. Kepedulian anti *fraud* diupayakan secara berkesinambungan dalam bentuk *zero tolerance* terhadap *fraud*. Dalam penerapan Strategi Anti *Fraud* berupa sistem pengendalian Fraud, mencakup 4 (empat) pilar yang saling berkaitan yaitu Pencegahan, Deteksi, Investigasi Pelaporan dan Sanksi, Pemantauan Evaluasi dan Tindak Lanjut.

However, improvements in economic performance may be accompanied by an increase in credit risk, particularly under conditions of economic uncertainty. Therefore, Bank Jatim consistently strengthens its credit risk management, develops credit analysis systems, and enhances the management of its financing portfolio.

Bank Jatim's economic performance is continuously evaluated for its effectiveness through the achievement of its Business Plan (RBB). Bank Jatim submits the RBB to the Financial Services Authority (OJK) for input for implementation in the coming year. During 2025, there were no negative impacts related to the Bank's economic performance or within its business relationships.

## Anti Corruption

Corruption is a form of violation that negatively impacts stakeholder trust. The negative impact of corruption risk was evident in the occurrence of fraud cases in 2025, which had the potential to undermine stakeholder confidence, cause financial losses, and give rise to legal risks for Bank Jatim.

Bank Jatim consistently implements mitigation measures by providing a whistleblowing system (WBS). Stakeholders can submit complaints about ethical violations committed by Bank Jatim employees by visiting Bank Jatim's head office, sending a letter to the Internal Audit Division, through the website <https://wbs.bankjatim.co.id>, or via SMS/WhatsApp or phone call to 081330003040, which is managed by the Internal Audit Division. Bank Jatim is committed to protecting the security and confidentiality of the identity of those who submit reports in good faith. All complaint databases and information are under the management and responsibility of the Internal Audit Division.

To prevent cases of operational irregularities at banks, particularly fraud that could harm customers or the bank, the Financial Services Authority (OJK) issued Regulation No. In accordance with OJK Regulation No. 39/POJK.03/2019 on December 19, 2019, concerning the Implementation of Anti-Fraud Strategies for Commercial Banks, it is necessary to improve the effectiveness of internal controls to minimize the risk of fraud, including implementing an anti-fraud strategy. Bank Jatim's commitment to the Anti-Bribery Management System Policy and Anti-Fraud Strategy SOP is stipulated in Regulation No. 063/03/10/DIR/AUI/KEP on February 21, 2024. Anti-fraud awareness is continuously pursued through zero tolerance for fraud. The implementation of the Anti-Fraud Strategy, in the form of a fraud control system, encompasses four interrelated pillars: Prevention, Detection, Investigation, Reporting and Sanctions, Monitoring, Evaluation, and Follow-up.

Evaluasi efektivitas penerapan sistem manajemen anti *fraud* yaitu melalui sertifikasi ISO 37001:2016 Sistem Manajemen Anti Penyuapan. Di tahun 2025, masih terdapat 22 insiden *fraud* yang terjadi pada karyawan tetap dan 3 (tiga) insiden *fraud* pada pegawai tidak tetap. Namun demikian, Bank terus berupaya untuk meningkatkan sistem manajemen anti *fraud* di seluruh aktivitas bisnisnya.

Berdasarkan evaluasi atas insiden *fraud* yang terjadi pada tahun 2025, Bank Jatim memperoleh pembelajaran bahwa penguatan pada aspek pencegahan dan deteksi dini masih diperlukan, khususnya dalam kepatuhan terhadap prosedur operasional dan efektivitas pengawasan internal. Pembelajaran ini telah diintegrasikan ke dalam kebijakan dan prosedur operasional melalui penyempurnaan SOP, peningkatan cakupan dan frekuensi audit internal, serta penguatan mekanisme pemantauan transaksi berisiko dan program pelatihan anti-*fraud* untuk memperkuat budaya integritas. Keterlibatan pemangku kepentingan, termasuk karyawan, nasabah, dan regulator, melalui WBS, hasil audit internal, serta evaluasi regulator, turut menginformasikan tindakan yang diambil Bank dalam memperbaiki pengendalian internal. Efektivitas dari tindakan tersebut dievaluasi secara berkala melalui pemantauan jumlah insiden *fraud*, tindak lanjut atas laporan pelanggaran, serta hasil pengawasan, di mana temuan masih adanya kasus *fraud* menunjukkan bahwa langkah mitigasi yang ada perlu terus ditingkatkan, khususnya dalam aspek pencegahan dan deteksi dini.

## Energi

Dalam menjalankan kegiatan operasionalnya, Bank Jatim memanfaatkan dua sumber energi utama, yaitu BBM untuk kendaraan operasional dan listrik untuk mendukung aktivitas kantor. Selain itu, Bank Jatim juga melakukan pengukuran penggunaan energi di luar lingkup organisasi, yang berasal dari perjalanan dinas karyawan. Bank Jatim menyadari bahwa penggunaan energi memiliki potensi dampak negatif berupa meningkatkan emisi, sehingga penting untuk menerapkan langkah-langkah efisiensi secara konsisten. Bank Jatim menyadari bahwa penggunaan energi akan berdampak pada peningkatan emisi apabila Bank tidak secara konsisten melakukan efisiensi penggunaan energi. Dampak negatif terkait penggunaan energi terutama berasal dari kegiatan operasional Bank Jatim, serta melalui hubungan bisnisnya yang berasal dari penggunaan energi dalam perjalanan dinas karyawan.

Komitmen Bank Jatim terhadap penghematan energi menjadi salah satu program prioritas yang tertuang dalam Rencana Aksi Keuangan Berkelanjutan (RAKB). Efisiensi penggunaan energi dilakukan melalui berbagai langkah, antara lain mematikan lampu dan alat elektronik saat tidak digunakan, melakukan pemeliharaan rutin AC di seluruh gedung untuk

Evaluation of the effectiveness of the anti-*fraud* management system implementation is performed through ISO 37001:2016 Anti-Bribery Management System certification. In 2025, there were 22 *fraud* incidents involving permanent employees and three *fraud* incidents involving non-permanent employees. However, the Company continues to strive to improve its anti-*fraud* management system across all its business activities.

Based on the evaluation of *fraud* incidents that occurred in 2025, Bank Jatim gained insights that strengthening preventive and early detection measures is still required, particularly in compliance with operational procedures and the effectiveness of internal controls. These learnings have been integrated into policies and operational procedures through the enhancement of SOPs, increased scope and frequency of internal audits, as well as the strengthening of high-risk transaction monitoring mechanisms and anti-*fraud* training programs to reinforce a culture of integrity. Stakeholder involvement, including employees, customers, and regulators, through the Whistleblowing System (WBS), internal audit findings, and regulatory assessments, has also informed the Bank's actions in improving internal controls. The effectiveness of these measures is periodically evaluated through monitoring the number of *fraud* incidents, follow-up on violation reports, and supervisory results, where the continued occurrence of *fraud* cases indicates that existing mitigation measures need to be further strengthened, particularly in terms of prevention and early detection.

## Energy

To perform its operations, Bank Jatim utilizes two primary energy sources: fuel for operational vehicles and electricity to support office activities. Furthermore, Bank Jatim also measures energy usage outside the organization, which originates from employee travel. The Bank Jatim recognizes that energy utilization has the potential to increase emissions; therefore, it is crucial to consistently implement efficiency measures. Bank Jatim also recognizes that energy consumption will have an impact on emissions if the Bank does not consistently implement energy efficiency measures. Negative impacts related to energy consumption primarily arise from Bank Jatim's operational activities, as well as through its business relationships, particularly from energy use associated with employees' business travel.

Bank Jatim's commitment to energy conservation is one of the priority programs outlined in the Sustainable Finance Action Plan (RAKB). Energy efficiency is achieved through various measures, including turning off lights and electronic devices when not in use, conducting routine maintenance on air conditioning units throughout the building to prevent

mencegah kerusakan yang dapat menimbulkan pemborosan listrik, serta mengurangi frekuensi kunjungan fisik. Efisiensi penggunaan energi berada di bawah koordinasi dari Divisi Umum, serta menjadi tanggung jawab seluruh insan Bank.

Bank Jatim senantiasa melakukan pembahasan secara rutin dengan seluruh karyawan Bank terkait dengan upaya efisiensi yang telah dilakukan oleh masing-masing unit kerja agar dapat meningkatkan efektivitas penerapan penghematan energi. Bank Jatim menetapkan tahun 2024 sebagai baseyear dalam pengukuran kinerja energi. Sasaran yang ditetapkan yaitu meningkatkan efisiensi penggunaan energi melalui pengurangan konsumsi energi operasional. Evaluasi efektivitas penghematan energi dilakukan dengan membandingkan penggunaan energi di tahun 2025 dengan energi di tahun 2024. Atas upaya Bank Jatim dalam melakukan upaya penghematan energi, sepanjang tahun 2025 penggunaan energi yaitu sebesar 13.537,29 gigajoule menurun dibandingkan tahun 2024 yang sebesar 14.563,28 gigajoule.

Berdasarkan hasil evaluasi terhadap efisiensi energi, Bank Jatim senantiasa secara konsisten menerapkan upaya efisiensi penggunaan energi. Upaya ini telah diintegrasikan dalam RAKB melalui penguatan pedoman efisiensi energi, peningkatan pemantauan penggunaan energi di setiap unit, serta pengembangan program internal yang mendorong perilaku hemat energi di seluruh organisasi.

## Emisi

Seluruh aktivitas operasional yang memanfaatkan energi secara alami menghasilkan emisi gas rumah kaca (GRK). Penggunaan BBM menjadi sumber emisi GRK cakupan 1, pemakaian listrik termasuk dalam emisi GRK cakupan 2, dan perjalanan dinas masuk ke dalam emisi GRK cakupan 3. Penggunaan energi yang tidak efisien atau tidak bijaksana berpotensi meningkatkan dampak negatif berupa meningkatnya jumlah emisi, sehingga dapat memberikan dampak negatif terhadap lingkungan, termasuk risiko perubahan iklim.

Komitmen Bank Jatim dalam efisiensi penggunaan energi, yang menjadi salah satu program prioritas dan tertuang dalam RAKB Bank Jatim, berdampak langsung pada penurunan emisi yang dihasilkan. Upaya pengurangan emisi ini dilakukan sejalan dengan langkah-langkah efisiensi energi yang diterapkan dalam seluruh kegiatan operasional Bank yang berada di bawah koordinasi dari Divisi Umum, serta menjadi tanggung jawab seluruh insan Bank.

Efektivitas penurunan emisi GRK dilakukan dengan membandingkan emisi GRK yang dihasilkan di tahun 2025 dengan target yaitu berdasarkan baseline yaitu tahun 2024. Keterlibatan pemangku kepentingan, khususnya karyawan

damage that could lead to electricity waste, and reducing the frequency of physical visits. Energy efficiency is coordinated by the General Affairs Division and is the responsibility of all Bank employees.

Bank Jatim regularly discusses with all Bank employees the efficiency efforts undertaken by each work unit to improve the effectiveness of energy savings implementation. Bank Jatim has designated 2024 as the base year for measuring its energy performance. The target established is to improve energy efficiency through the reduction of operational energy consumption. Evaluation of the effectiveness of energy savings was conducted by comparing energy usage in 2025 with energy in 2024. Due to Bank Jatim's efforts in making energy savings efforts, throughout 2025, energy usage of 13,537.29 gigajoules decreased compared to 2024, which was 14,563.28 gigajoules.

Based on the evaluation of energy efficiency, Bank Jatim consistently implements energy efficiency measures. These measures have been integrated into the RAKB through the strengthening of energy efficiency guidelines, enhanced monitoring of energy consumption across each unit, and the development of internal programs that promote energy-saving behavior throughout the organization.

## Emission

All operational activities that utilize energy naturally produce greenhouse gas (GHG) emissions. Fuel use is a source of scope 1 GHG emissions, electricity consumption is included in scope 2 GHG emissions, and business travel is included in scope 3 GHG emissions. Inefficient or unwise energy consumption has the potential to increase negative impacts in the form of higher emissions, which may also adversely affect the environment, including climate change risks.

Bank Jatim's commitment to energy efficiency, a priority program outlined in the Bank Jatim Business Plan (RAKB), has a direct impact on reducing emissions. These emission reduction efforts are carried out in line with energy efficiency measures implemented in all Bank operational activities, under the coordination of the General Affairs, and are the responsibility of all Bank personnel.

The effectiveness of GHG emissions reduction is assessed by comparing the GHG emissions generated in 2025 against the established target, using 2024 as the baseline year. Stakeholder engagement, particularly with operational

sebagai pelaksana operasional, dilakukan melalui forum internal, sosialisasi, serta diskusi rutin terkait efisiensi energi, yang memberikan masukan terhadap perbaikan program yang dijalankan. Atas upaya yang telah dilakukan, maka sepanjang tahun 2025, total emisi GRK menjadi sebesar 2.876,85 Ton Co<sup>2</sup>-eq menurun dibandingkan tahun 2024 yang sebesar 3.094,84 Ton Co<sup>2</sup>-eq.

Berdasarkan evaluasi atas upaya efisiensi energi dan penurunan emisi GRK, Bank Jatim harus senantiasa konsisten dalam mengimplementasikan kebijakan serta keterlibatan aktif seluruh unit kerja menjadi faktor penting dalam mencapai penurunan emisi secara berkelanjutan. Upaya ini telah terintegrasi ke dalam RAKB yang diimplementasikan melalui penguatan pedoman efisiensi energi, peningkatan pengawasan penggunaan energi di unit kerja, serta pengembangan program internal yang mendorong perilaku hemat energi.

## Privasi Nasabah

Dampak positif dari kemajuan teknologi dan digitalisasi adalah mempermudah pelayanan kepada nasabah serta mendukung pengembangan produk-produk digital banking, yang pada gilirannya meningkatkan pertumbuhan kinerja Bank Jatim. Namun demikian, kemajuan teknologi juga memberikan dampak negatif pada tingginya potensi risiko tingginya risiko terhadap keamanan data nasabah, termasuk potensi peretasan (*hacking*), karena kemudahan akses digital yang dihasilkan oleh perkembangan teknologi dapat dimanfaatkan pihak yang tidak bertanggung jawab.

Bank Jatim berkomitmen menjaga kepercayaan nasabah agar loyalitas tetap terjaga, sesuai dengan ketentuan Undang-Undang Nomor 27 Tahun 2022 tentang Perlindungan Data Pribadi dan Surat Edaran OJK No. 14/SEOJK.07/2014 tentang Kerahasiaan dan Keamanan Data dan/atau Informasi Pribadi Konsumen. These efforts have been integrated into the RAKB through the strengthening of energy efficiency guidelines, enhanced monitoring of energy consumption across work units, and the development of internal programs that promote energy-saving behavior.

## Customer Privacy

The positive impact of technological advances and digitalization is streamlining customer service and supporting the development of digital banking products, which in turn boosts Bank Jatim's performance growth. However, technological advancements also have a negative impact, increasing the potential for high risks to customer data security, including the potential for hacking, as the ease of digital access afforded by technological advancements can be exploited by irresponsible parties.

Bank Jatim is committed to maintaining customer trust and maintaining loyalty, in accordance with Law Number 27 of 2022 concerning Personal Data Protection and OJK Circular Letter No. 14/SEOJK.07/2014 concerning Confidentiality and Security of Consumer Personal Data and/or Information. Bank Jatim is committed to protecting customer personal information by enhancing the security of its information technology systems for managing customer personal data and/or information.

The evaluation of the effectiveness of customer data security is reflected in the Bank's achievement of ISO 27001:2022 Information Security Management System certification for Jconnect Mobile, SMS Banking, and Internet Banking services, as well as ISO 20000-1:2018 Information Technology Service Management System certification. Customer privacy management falls under the responsibility of the Chief Information Security Officer (CISO) Division with the function of the Data Protection Officer. Bank Jatim continuously strives to enhance the quality of its products and services to meet customer expectations and deliver maximum satisfaction.

Terkait penanganan pengaduan, sebagai salah satu kewajiban, Bank Jatim melaporkan penanganan dan penyelesaian pengaduan nasabah kepada Bank Indonesia dan Otoritas Jasa Keuangan setiap triwulan.

Upaya Bank Jatim dalam menjaga kerahasiaan data nasabah memberikan dampak positif bahwa selama tahun pelaporan Bank Jatim tidak mendapat laporan pengaduan mengenai pelanggaran terhadap pelanggaran privasi nasabah dan hilangnya data nasabah sehingga Bank Jatim tidak mendapat sanksi atau denda dari regulator.

Dari evaluasi pengelolaan keamanan data nasabah, Bank Jatim senantiasa meningkatkan keamanan sistem teknologi informasi dan penguatan prosedur operasional merupakan faktor penting dalam menjaga kepercayaan dan loyalitas nasabah. Insight ini telah diintegrasikan ke dalam kebijakan dan prosedur operasional melalui penguatan standar keamanan informasi, pemeliharaan sertifikasi ISO 27001:2022 dan ISO 20000-1:2018, serta pembaruan SOP layanan digital seperti Jconnect Mobile, SMS Banking, dan Internet Banking. Efektivitas tindakan ini dievaluasi secara berkala melalui tidak adanya laporan pelanggaran privasi atau kehilangan data selama tahun pelaporan, pemantauan audit internal, serta pelaporan rutin ke regulator, yang menunjukkan bahwa kebijakan dan prosedur yang diterapkan mampu mengelola risiko secara efektif, sekaligus mendorong perbaikan berkelanjutan di layanan digital Bank.

Stakeholder engagement, particularly customers and operational teams, is conducted through complaints handling, customer satisfaction surveys, and interactions with the “Info Bank Jatim 14044” Call Center, which operates 24 hours a day, 7 (seven) days a week throughout the year, and also serves as a platform for providing input to improve services and strengthen system security. In relation to complaint handling, as part of its obligations, Bank Jatim reports the handling and resolution of customer complaints to Bank Indonesia and the Financial Services Authority (OJK) on a quarterly basis.

Bank Jatim’s efforts to maintain the confidentiality of customer data have had a positive impact, namely that during the reporting year, Bank Jatim did not receive any complaints regarding violations of customer privacy and loss of customer data, so that Bank Jatim did not receive sanctions or fines from regulators.

Based on the evaluation of customer data security management, Bank Jatim consistently enhances information technology system security, and the strengthening of operational procedures is a key factor in maintaining customer trust and loyalty. These insights have been integrated into policies and operational procedures through the strengthening of information security standards, the maintenance of ISO 27001:2022 and ISO 20000-1:2018 certifications, as well as the updating of SOPs for digital services such as Jconnect Mobile, SMS Banking, and Internet Banking. The effectiveness of these measures is periodically evaluated through the absence of privacy breach or data loss incidents during the reporting period, internal audit monitoring, and regular reporting to regulators, indicating that the implemented policies and procedures are able to effectively manage risks while also driving continuous improvement in the Bank’s digital services.

### Strategi Dalam Pengelolaan Risiko dan Peluang Terkait Keberlanjutan

[IFRS S1-STRATEGY, IFRS S2-STRATEGY, IFRS S1-METRIC AND TARGET, IFRS S2-METRIC AND TARGET, IFRS S1-RISK MANAGEMENT, IFRS S2-RISK MANAGEMENT, GRI 201-2]

Strategi keberlanjutan yang dirumuskan Bank Jatim senantiasa mengacu pada PSPK 1 dan PSPK 2 (IFRS S1 dan IFRS S2). Hal ini dilakukan dengan mempertimbangkan risiko dan peluang terkait keberlanjutan, termasuk yang berkaitan dengan perubahan iklim serta implikasi finansialnya. Risiko perubahan iklim merupakan risiko yang disebabkan oleh kenaikan suhu bumi dan menjadi perhatian global. Namun demikian, perubahan iklim tidak memberikan dampak langsung pada sektor perbankan, terutama pada Bank Jatim. Bank Jatim telah mengidentifikasi risiko dan peluang keberlanjutan termasuk perubahan iklim. Berdasarkan hasil identifikasi tersebut, Bank Jatim telah mengembangkan sistem manajemen risiko yang bertujuan untuk mengelola risiko dan peluang keberlanjutan. Bank Jatim juga telah memiliki penanggungjawab keuangan berkelanjutan sebagaimana telah disampaikan dalam bagian

### Strategies in Managing Risks and Opportunities Related to Sustainability

[IFRS S1-STRATEGY, IFRS S2-STRATEGY, IFRS S1-METRIC AND TARGET, IFRS S2-METRIC AND TARGET, IFRS S1-RISK MANAGEMENT, IFRS S2-RISK MANAGEMENT, GRI 201-2]

Bank Jatim’s sustainability strategy consistently refers to PSPK 1 and PSPK 2 (IFRS S1 and IFRS S2). This is undertaken by considering sustainability-related risks and opportunities, including those related to climate change and its financial implications. Climate change risk is a risk caused by rising global temperatures and is a global concern. However, climate change does not have a direct impact on the banking sector, especially Bank Jatim. Bank Jatim has identified sustainability risks and opportunities including climate change. Based on this identification, Bank Jatim has developed a risk management system that aims to manage sustainability risks and opportunities. Bank Jatim also has a sustainability finance focal point as mentioned in the Sustainability Governance section. In addition, Bank Jatim has established sustainability metrics and targets that have been presented in the Bank’s Sustainability

Tata Kelola Keberlanjutan. Di samping itu, Bank Jatim telah menetapkan metrik dan target keberlanjutan yang telah disampaikan pada Strategi Keberlanjutan Bank yang meliputi target pada aspek ekonomi, lingkungan dan sosial yang dituangkan pada kegiatan prioritas dan disertai indikator keberhasilan Bank. Selanjutnya, metrik dan target terkait aspek ekonomi, lingkungan, dan sosial disajikan pada Kinerja Keberlanjutan Bank.

Bank Jatim telah mengikuti time horizon atas risiko yang dihadapi sesuai dengan climate risk management & scenario analysis perbankan 2024 yang menyebutkan:

1. Short : memiliki jangka waktu analisis proyeksi selama 3 tahun kedepan
2. Medium : titik waktu 2030
3. Long : pada titik waktu 2040 sampai 2050

Di samping itu, dalam mengantisipasi isu keberlanjutan termasuk perubahan iklim, Bank Jatim juga senantiasa melakukan pemilihan dan evaluasi pemasok yang ramah lingkungan sebagai bagian dari pengelolaan rantai nilai (*value chain*). Langkah ini bertujuan untuk meminimalkan risiko keberlanjutan, sekaligus mendukung peluang dalam meningkatkan efisiensi operasional dan reputasi perusahaan. Penerapan ini terutama terkonsentrasi pada aktivitas pengadaan barang dan jasa, khususnya pada pemilihan mitra kerja, lokasi operasional pemasok, serta jenis aset atau produk yang digunakan dalam kegiatan operasional Bank. Bank Jatim senantiasa memastikan bahwa setiap pemasok telah mematuhi seluruh ketentuan peraturan perundang-undangan yang berlaku dalam menjalankan kegiatan usahanya, termasuk ketentuan yang berkaitan dengan aspek lingkungan dan sosial. Hal ini sesuai dengan Surat Keputusan Direksi Nomor 060/03/34/DIR/UMM/KEP tanggal 4 Oktober 2021 tentang Standard Operating Procedure (SOP) Pengadaan Barang/Jasa, serta Surat Keputusan Direksi Nomor 063/03/08/DIR/UMM/KEP tanggal 7 Februari 2024 tentang Standard Operating Procedure (SOP) Vendor Management PT Bank Pembangunan Daerah Jawa Timur Tbk.

Namun demikian, sepanjang tahun 2025, Bank Jatim belum melakukan perhitungan atau analisis khusus mengenai dampak finansial atas risiko perubahan iklim terhadap bisnis dan kinerjanya, serta belum melakukan pengukuran biaya atas pengelolaan risiko Bank. Adapun risiko dan peluang keberlanjutan serta perubahan iklim serta dampak potensial yang dihadapi Bank Jatim sebagai berikut.

Strategy which includes targets on economic, environmental and social aspects as outlined in priority activities and accompanied by indicators of the Bank's success. Furthermore, metrics and targets related to economic, environmental and social aspects are presented in the Bank's Sustainability Performance.

Bank Jatim has followed the time horizon for the risks faced in accordance with the 2024 banking climate risk management & scenario analysis, which states:

1. Short: has a projection analysis period of the next three years.
2. Medium: 2030.
3. Long: 2040 to 2050.

In addition, to anticipate sustainability issues, including climate change, Bank Jatim also consistently selects and evaluates green suppliers as part of its value chain management. This step aims to minimize sustainability risks while supporting opportunities to improve operational efficiency and the company's reputation. This implementation is primarily focused on goods and services procurement activities, specifically the selection of business partners, supplier operational locations, and the types of assets or products used in the Bank's operations. Bank Jatim consistently ensures that each supplier complies with all applicable laws and regulations in carrying out its business activities, including provisions relating to environmental and social aspects. This is in accordance with Board of Directors Decree Number 060/03/34/DIR/UMM/KEP dated October 4, 2021, concerning Standard Operating Procedures (SOP) for Procurement of Goods/Services, and Board of Directors Decree Number 063/03/08/DIR/UMM/KEP on February 7, 2024, concerning Standard Operating Procedures (SOP) for Vendor Management of PT Bank Pembangunan Daerah Jawa Timur Tbk.

However, during 2025, Bank Jatim did not conduct any specific calculations or analysis regarding the financial impact of climate change risks on its business and performance, nor has it measured the costs of managing the Bank's risks. The risks and opportunities for sustainability, climate change, and potential impacts dealt with Bank Jatim are as follows.

## Strategi Kinerja Ekonomi

Bank Jatim sebagai bagian dari sektor jasa keuangan secara aktif memanfaatkan pertumbuhan ekonomi Indonesia yang berkelanjutan untuk meningkatkan kinerjanya. Hal ini tercermin dari tren positif dalam laporan keuangan tahun pelaporan yang telah diaudit oleh Kantor Akuntan Publik, yang memungkinkan Bank memberikan kontribusi bagi seluruh pemangku kepentingan sekaligus mendukung pertumbuhan ekonomi di Provinsi Jawa Timur. Pencapaian ini juga mencerminkan keberhasilan pelaksanaan kebijakan dan inisiatif strategis yang tercantum dalam Rencana Bisnis Bank (RBB) 2025, yang disusun berdasarkan evaluasi kondisi perekonomian sepanjang 2024 serta prediksi lembaga nasional dan internasional.

Komitmen Bank Jatim terhadap kinerja ekonomi tercermin dalam penerapan kebijakan dan inisiatif strategis secara konsisten, termasuk pelaksanaan Tanggung Jawab Sosial dan Lingkungan (TJSL) sesuai Surat Keputusan Direksi No. 063/03/83/DIR/CSE/KEP Tanggal 20 May 2024 tentang SOP Tanggung Jawab Sosial dan Lingkungan PT. Bank Pembangunan Daerah Jawa Timur Tbk. Manajemen secara berkala melakukan sosialisasi kepada seluruh pegawai untuk memastikan dukungan dan kontribusi maksimal dalam pencapaian target RBB. Pengelolaan kinerja ekonomi ini berada di bawah tanggung jawab Divisi Akuntansi Manajemen dan Keuangan, serta dievaluasi efektivitasnya melalui ketercapaian target RBB dan masukan dari Otoritas Jasa Keuangan untuk perbaikan tahun berikutnya.

Strategi kinerja ekonomi Bank Jatim juga mengintegrasikan prinsip ESG dalam proses analisis kredit, pengaturan eksposur dan konsentrasi sektor agar tidak terkonsentrasi pada sektor berisiko tinggi, serta pemantauan portofolio kredit untuk mengidentifikasi potensi risiko akibat perubahan regulasi, tekanan pasar, atau dampak perubahan iklim. Selain itu,

## Economic Performance Strategy

A part of the financial services sector, Bank Jatim actively leverages Indonesia's sustainable economic growth to improve its performance. This is reflected in the positive trend in the financial statements for the reporting year, audited by a Public Accounting Firm, enabling the Bank to contribute to all stakeholders while supporting economic growth in East Java Province. This achievement also reflects the successful implementation of the policies and strategic initiatives outlined in the Bank's 2025 Business Plan (RBB), which was prepared based on an evaluation of economic conditions throughout 2024 and predictions from national and international institutions.

Bank Jatim's commitment to economic performance is reflected in the consistent implementation of strategic policies and initiatives, including the implementation of Social and Environmental Responsibility (TJSL) in accordance with the Decree of the Board of Directors No. 063/03/83/DIR/CSE/KEP dated May 20, 2024 concerning the SOP for Social and Environmental Responsibility of PT. Bank Pembangunan Daerah Jawa Timur Tbk. Management regularly conducts outreach to all employees to ensure maximum support and contribution to achieving the RBB targets. The management of economic performance falls under the responsibility of the Management Accounting and Finance Division, and its effectiveness is evaluated based on the achievement of RBB targets and input from the Financial Services Authority for improvement in the following year.

Bank Jatim's economic performance strategy also integrates ESG principles into its credit analysis process, manages exposure and sector concentration to avoid concentration in high-risk sectors, and monitors its credit portfolio to identify potential risks resulting from regulatory changes, market pressures, or the impacts of climate change. Furthermore,

penguatan tata kelola dan pelaporan dalam manajemen risiko dilakukan untuk memastikan akuntabilitas dan keberlanjutan bisnis Bank. Selama tahun 2025, tidak terdapat dampak negatif yang signifikan terkait kinerja ekonomi yang dikelola oleh Bank Jatim.

## Strategi Anti Korupsi

Tindakan korupsi dan fraud merupakan risiko serius yang berdampak negatif bagi Bank Jatim, termasuk menurunnya kepercayaan pemangku kepentingan, kerugian finansial, serta potensi risiko hukum. Hal ini tercermin dari kasus fraud pada tahun 2025, yang meskipun relatif terbatas jumlahnya, menunjukkan perlunya penguatan sistem pengendalian internal dan strategi anti fraud untuk melindungi reputasi dan stabilitas operasional Bank. Risiko ini menuntut *trade-off* antara efisiensi operasional dan penerapan pengendalian yang ketat, karena semakin komprehensif pengawasan, potensi hambatan birokrasi dalam aktivitas bisnis juga meningkat.

Sebagai upaya mitigasi, Bank Jatim menyediakan whistleblowing system (WBS) yang memungkinkan pemangku kepentingan menyampaikan pengaduan secara aman dan rahasia, baik melalui kantor pusat, surat ke Divisi Audit Internal, website, maupun komunikasi elektronik seperti SMS/WhatsApp. Seluruh pengaduan dikelola oleh Divisi Audit Internal, dengan komitmen perlindungan identitas pelapor. Selain itu, Bank menerapkan Kebijakan Sistem Manajemen Anti Penyuapan dan SOP Strategi Anti Fraud yang menekankan *zero tolerance* terhadap fraud melalui empat pilar utama: Pencegahan, Deteksi, Investigasi dan Sanksi, serta Pemantauan dan Evaluasi. Strategi ini menimbulkan *trade-off* antara perlindungan maksimal terhadap risiko *fraud* dan kebutuhan untuk tetap menjaga kelancaran proses bisnis.

Evaluasi efektivitas sistem manajemen anti fraud dilakukan melalui sertifikasi ISO 37001:2016 Sistem Manajemen Anti Penyuapan, yang menjadi tolok ukur kepatuhan dan efektivitas pengendalian. Strategi ini diimbangi dengan upaya menjaga kredibilitas Bank di mata shareholder dan stakeholder serta tanggap dalam merespons keluhan maupun pemberitaan negatif, menunjukkan bahwa penguatan anti korupsi memerlukan keseimbangan antara kontrol ketat dan keberlangsungan operasional.

## Strategi Perubahan Iklim [FN-CB-550a.2]

Risiko perubahan iklim merupakan risiko yang berpotensi berdampak pada penurunan kualitas air, berkurangnya ketersediaan air bersih, serta kondisi cuaca yang semakin sulit diprediksi dan meningkatnya kejadian cuaca ekstrem yang dapat memicu bencana alam, seperti banjir, longsor, dan kebakaran. Namun demikian, berdasarkan evaluasi yang dilakukan, kegiatan operasional Bank Jatim tidak terdampak secara signifikan oleh risiko perubahan iklim. Upaya Bank Jatim dalam memitigasi risiko perubahan iklim yaitu dengan

strengthened governance and reporting in risk management are implemented to ensure the Bank's accountability and business sustainability. Throughout 2025, there will be no significant negative impacts related to Bank Jatim's economic performance.

## Anti-Corruption Strategy

Corruption and fraud constitute serious risks that have adverse impacts on Bank Jatim, including declining stakeholder trust, financial losses, and potential legal risks. This is reflected in fraud cases in 2025, which, although relatively limited in number, indicate the need to strengthen the internal control system and anti-fraud strategy to safeguard the Bank's reputation and operational stability. These risks require a trade-off between operational efficiency and the implementation of stringent controls, as more comprehensive oversight may increase bureaucratic constraints in business activities.

As a mitigation effort, Bank Jatim provides a whistleblowing system (WBS) that enables stakeholders to submit complaints in a secure and confidential manner, either through the head office, written correspondence to the Internal Audit Division, the website, or electronic communication such as SMS/WhatsApp. All complaints are managed by the Internal Audit Division, with a commitment to protecting the identity of the whistleblower. In addition, the Bank implements an Anti-Bribery Management System Policy and Standard Operating Procedures (SOP) for Anti-Fraud Strategy, which emphasize zero tolerance for fraud through four main pillars: Prevention, Detection, Investigation and Sanctions, as well as Monitoring and Evaluation. This strategy entails a trade-off between maximum protection against fraud risk and the need to maintain smooth business processes.

The effectiveness of the anti-fraud management system is evaluated through ISO 37001:2016 Anti-Bribery Management System certification, which serves as a benchmark for compliance and control effectiveness. This strategy is balanced with efforts to maintain the Bank's credibility in the eyes of shareholders and stakeholders, as well as responsiveness in addressing complaints and negative publicity, demonstrating that strengthening anti-corruption measures requires a balance between stringent controls and operational continuity.

## Climate Change Strategy [FN-CB-550a.2]

Climate change risk is a risk that may result in declining water quality, reduced availability of clean water, increasingly unpredictable weather conditions, and a rise in extreme weather events that may trigger natural disasters, such as floods, landslides, and fires. However, based on the evaluation conducted, Bank Jatim's operational activities have not been significantly affected by climate change risks. Bank Jatim's efforts to mitigate climate change risks include the implementation of business continuity management (BCM) as

menerapkan *business continuity management* (BCM) yang digunakan sebagai panduan dalam penanganan bencana/gangguan, serta melakukan penghematan energi. Sampai dengan akhir tahun 2025, Bank Jatim belum menghitung biaya yang diambil dari pengelolaan risiko atau peluang terkait perubahan iklim.

Bank Jatim telah melakukan perhitungan Climate Risk Management & Scenario Analysis (CRMS) sebagai bagian dari upaya pengelolaan risiko perubahan iklim dalam kegiatan operasional dan bisnis Bank. Pelaksanaan CRMS tersebut dilakukan sesuai dengan arahan Otoritas Jasa Keuangan (OJK) sebagaimana tertuang dalam Surat OJK Nomor S-37/D.03/2024 tanggal 4 November 2024 dan Surat OJK Nomor S-79/PB.01/2025 tanggal 28 Mei 2025. Melalui penerapan CRMS, Bank Jatim melakukan identifikasi, pengukuran, serta analisis skenario risiko perubahan iklim untuk memahami potensi dampak terhadap kinerja dan keberlanjutan usaha, sekaligus sebagai dasar dalam penyusunan strategi mitigasi dan penguatan ketahanan Bank terhadap risiko iklim ke depan. Bank Jatim telah melakukan pengukuran dampak risiko transisi dan risiko fisik pada risiko kredit dan risiko operasional. Adapun besaran emisi GRK dari debitur telah disampaikan pada bagian Aspek Emisi pada Laporan Keberlanjutan ini.

Hasil stress test atas risiko fisik dan risiko transisi digunakan sebagai input dalam proses evaluasi potensi peningkatan risiko kredit, risiko pasar, dan risiko operasional serta memastikan kecukupan modal dan capital buffer tetap memadai. Selain itu, hasil CRMS menjadi dasar dalam penyusunan Rencana Bisnis Bank (RBB), penyesuaian strategi portofolio pembiayaan pada sektor yang lebih resilient dan berkelanjutan, penyempurnaan kebijakan manajemen risiko dan limit eksposur, serta penguatan risk appetite framework dan business continuity management guna menjaga ketahanan dan keberlanjutan usaha Bank Jatim dalam jangka panjang yang responsif terhadap risiko terkait iklim.

## Strategi Privasi Nasabah

Bank Jatim menekankan strategi perlindungan privasi nasabah sebagai bagian integral dari pengelolaan risiko dan layanan digital. Strategi ini mencakup peningkatan keamanan sistem teknologi informasi, penerapan ISO 27001:2022 Sistem Manajemen Keamanan Informasi dan ISO 20000-1:2018 Sistem Manajemen Layanan TI, serta pengawasan penuh oleh Divisi Chief Information Security Officer (CISO). Pendekatan ini bertujuan untuk meminimalkan risiko peretasan dan kebocoran data, sekaligus menjaga kepercayaan dan loyalitas nasabah sesuai Undang-Undang Nomor 27 Tahun 2022 tentang Perlindungan Data Pribadi dan Surat Edaran OJK No. 14/SEOJK.07/2014. Trade-off yang dihadapi adalah kebutuhan investasi berkelanjutan dalam teknologi dan pengendalian internal agar layanan tetap aman tanpa mengurangi aksesibilitas dan kemudahan penggunaan bagi nasabah.

a guideline for handling disasters/disruptions, as well as energy conservation measures. As of the end of 2025, Bank Jatim has not calculated the costs incurred from managing risks or opportunities related to climate change.

Bank Jatim has conducted Climate Risk Management & Scenario Analysis (CRMS) as part of its efforts to manage climate change risks in the Bank's operational and business activities. The implementation of CRMS was carried out in accordance with the directives of the Financial Services Authority (OJK) as stipulated in OJK Letter No. S-37/D.03/2024 dated November 4, 2024 and OJK Letter No. S-79/PB.01/2025 dated May 28, 2025. Through the implementation of CRMS, Bank Jatim conducts identification, measurement, and scenario analysis of climate change risks to understand their potential impacts on performance and business sustainability, while also serving as a basis for formulating mitigation strategies and strengthening the Bank's resilience to future climate risks. Bank Jatim has measured the impact of transition risks and physical risks on credit risk and operational risk. The amount of GHG emissions from debtors has been disclosed in the Emissions Aspect section of this Sustainability Report.

The results of stress testing on physical and transition risks are used as inputs in evaluating potential increases in credit risk, market risk, and operational risk, as well as in ensuring that capital adequacy and capital buffers remain sufficient. In addition, the results of the Climate Risk Management System (CRMS) serve as a basis for the preparation of the Bank Business Plan (RBB), adjustments to the financing portfolio strategy toward more resilient and sustainable sectors, refinement of risk management policies and exposure limits, and strengthening of the risk appetite framework and business continuity management to maintain Bank Jatim's long-term resilience and sustainability in response to climate-related risks.

## Customer Privacy Strategy

Bank Jatim emphasizes customer privacy protection as an integral part of risk management and digital services. This strategy includes enhancing the security of information technology systems, implementing ISO 27001:2022 Information Security Management System and ISO 20000-1:2018 IT Service Management System, as well as comprehensive oversight by the Chief Information Security Officer (CISO) Division. This approach aims to minimize the risks of cyberattacks and data breaches, while maintaining customer trust and loyalty in accordance with Law No. 27 of 2022 concerning Personal Data Protection and OJK Circular Letter No. 14/SEOJK.07/2014. The trade-off lies in the need for continuous investment in technology and internal controls to ensure that services remain secure without compromising accessibility and ease of use for customers.

Selain penguatan sistem teknologi, Bank Jatim juga menekankan strategi responsif terhadap pengaduan nasabah melalui unit Call Center “Info Bank Jatim 14044” yang beroperasi 24/7 dan pelaporan rutin ke Bank Indonesia serta Otoritas Jasa Keuangan. Strategi ini memastikan deteksi dini dan penyelesaian cepat atas potensi masalah privasi, sehingga memberikan dampak positif berupa tidak adanya kasus kebocoran data atau pelanggaran privasi selama tahun pelaporan. Dengan kombinasi strategi pencegahan dan responsif ini, Bank Jatim mampu menjaga kredibilitas, meminimalkan risiko reputasi, dan memberikan kepuasan maksimal bagi seluruh pemangku kepentingan.

In addition to strengthening technology systems, Bank Jatim also emphasizes a responsive strategy to customer complaints through the “Info Bank Jatim 14044” Call Center unit, which operates 24/7, and regular reporting to Bank Indonesia and the Financial Services Authority (Otoritas Jasa Keuangan). This strategy ensures early detection and prompt resolution of potential privacy issues, resulting in a positive outcome, as there were no cases of data breaches or privacy violations during the reporting year. Through this combination of preventive and responsive strategies, Bank Jatim is able to maintain its credibility, minimize reputational risks, and deliver optimal satisfaction to all stakeholders.

# Penilaian Risiko atas Penerapan Keuangan Berkelanjutan

[OJK E.3, FS2, IFRS S1-RISK MANAGEMENT, IFRS S2-RISK MANAGEMENT]

## Risk Assessment of Sustainable Financial Implementation

Dalam menjalankan kegiatan usahanya, Bank Jatim menyadari bahwa terdapat berbagai potensi risiko yang dapat timbul sebagai konsekuensi dari aktivitas operasional yang dilakukan. Oleh karena itu, melalui penerapan manajemen risiko yang terintegrasi, Bank Jatim secara berkelanjutan berupaya meminimalkan dampak negatif yang mungkin muncul dari potensi risiko tersebut, termasuk risiko yang berkaitan dengan tiga aspek utama, yaitu aspek ekonomi, sosial, dan lingkungan termasuk perubahan iklim. Penerapan manajemen risiko ini ditujukan untuk mengelola berbagai risiko yang melekat pada seluruh aktivitas Bank sehingga mampu memberikan nilai tambah yang berkelanjutan serta mendukung tercapainya kinerja yang optimal dalam setiap kegiatan operasional. Proses manajemen risiko dijalankan sebagai bagian yang tidak terpisahkan dari aktivitas operasional sehari-hari, dengan tujuan memastikan bahwa setiap risiko dapat diidentifikasi, dipertimbangkan, dievaluasi, serta direspons secara tepat baik dari segi metode penanganan maupun waktu pelaksanaannya. Adapun pelaksanaan manajemen risiko di Bank Jatim terdiri dari:

### a. Identifikasi dan Penilaian Risiko

Agar tercipta manajemen risiko yang efektif, risiko perlu didefinisikan dengan jelas, diidentifikasi secara proaktif dan dinilai secara berkelanjutan dengan dasar *forward looking*. Identifikasi dan penilaian risiko yang tepat berfokus pada kesadaran dan memahami seluruh risiko inherent yang utama dalam aktivitas bisnis atau risiko-risiko utama yang dapat muncul dari faktor eksternal atau ketidakpastian.

Bank melakukan identifikasi risiko melalui hasil *self assesment* Profil risiko cabang (PRC) sebagai alat *Risk Control Self-Assessment* di cabang, yang merupakan suatu pendekatan terstruktur yang memungkinkan *First Line of Defense* untuk melakukan identifikasi dan penilaian terhadap risiko kunci dan kontrol sehingga dapat merencanakan tindakan perbaikan yang tepat untuk meminimalkan eksposur risiko yang ada.

### b. Pengukuran Risiko

Pengukuran risiko bertujuan untuk mengukur profil risiko Bank guna memperoleh gambaran efektifitas penerapan manajemen risiko dengan mengetahui besaran risiko suatu produk, portofolio dan aktifitas, serta dampaknya terhadap profitabilitas dan permodalan Bank.

### c. Pengelolaan dan Pengendalian Risiko

Pengelolaan dan mitigasi risiko merupakan bagian yang tidak terpisahkan dari bisnis Bank yang bertujuan untuk mengurangi risiko sampai kepada tingkat yang dapat dikelola dan dalam batasan *risk appetite*.

In conducting its business activities, Bank Jatim recognizes that various risks may arise as a consequence of its operational activities. Therefore, through the implementation of an integrated risk management framework, Bank Jatim continuously strives to minimize the potential adverse impacts arising from such risks, including those related to the three key sustainability aspects, namely economic, social, and environmental aspects, including climate change. The implementation of risk management is intended to manage the various risks inherent in all of the Bank's activities, thereby creating sustainable value and supporting the achievement of optimal performance across its operations. Risk management is embedded as an integral part of day-to-day operational activities, with the objective of ensuring that all risks are appropriately identified, assessed, evaluated, and addressed through suitable mitigation measures and timely implementation. The implementation of risk management at Bank Jatim consists of the following:

### a. Risk Identification and Assessment

To create effective risk management, risks need to be clearly defined, proactively identified, and assessed on an ongoing basis on a forward-looking basis. Proper risk identification and assessment focuses on awareness of and understanding all major inherent risks in business activities or key risks that may arise from external factors or uncertainty.

The Bank conducts risk identification through the results of the (PRC) branch risk profile self-assessment as a risk control self-assessment tool in the branch, which is a structured approach that allows the First Line of Defense to identify and assess key risks and controls to plan appropriate corrective actions to minimize existing risk exposure.

### b. Risk Measurement

Risk measurement aims to measure the Bank's risk profile to obtain an overview of the effectiveness of risk management implementation by knowing the amount of risk of a product, portfolio, and activity, as well as its impact on the Bank's profitability and capital.

### c. Risk Management and Control

Risk management and mitigation is an integral part of the Bank's business which aims to reduce risk to a manageable level and within the limits of risk appetite.

## d. Pemantauan dan pelaporan

Pemantauan risiko bertujuan untuk mengevaluasi eksposur risiko secara berkesinambungan dan melakukan penyempurnaan proses pelaporan apabila terdapat perubahan kegiatan usaha Bank, produk, transaksi, faktor risiko, teknologi informasi dan sistem informasi manajemen risiko yang bersifat material. Risiko-risiko tersebut dipantau dan dilaporkan secara berkala untuk memastikan bahwa risiko-risiko tersebut masih dalam batasan *risk appetite* Bank.

Dalam kerangka *three lines of defense*, Bank Jatim menerapkan pembagian peran yang jelas dalam pengelolaan risiko, termasuk risiko terkait perubahan iklim. Lini pertama, yaitu unit bisnis dan operasional, bertanggung jawab dalam mengidentifikasi, menilai, dan mengelola risiko yang timbul dari aktivitas operasional maupun penyaluran kredit, antara lain melalui pelaksanaan *Risk Control Self-Assessment*. Lini kedua, yaitu Satuan Kerja Manajemen Risiko (SKMR) dan fungsi kepatuhan, berperan dalam merumuskan kebijakan, melakukan pemantauan, serta memastikan bahwa pengelolaan risiko, termasuk risiko iklim, telah sesuai dengan kerangka manajemen risiko dan *risk appetite* Bank. Sementara itu, lini ketiga, yaitu Satuan Kerja Audit Intern (SKAI), menjalankan fungsi assurance secara independen untuk mengevaluasi efektivitas penerapan pengendalian internal dan manajemen risiko secara menyeluruh.

Dalam proses mengidentifikasi dan mengelola risiko iklim, terdapat kemungkinan munculnya risiko yang disebabkan oleh perubahan iklim yang semakin ekstrem. Salah satu bentuk dampak dari kondisi tersebut adalah terjadinya perubahan cuaca yang ekstrem yang berpotensi memicu bencana hidrometeorologi, seperti hujan lebat, tanah longsor, angin puting beliung, kemarau berkepanjangan, hujan es, serta genangan air. Oleh karena itu, Bank Jatim memiliki *Business Continuity Management* (BCM) yang digunakan sebagai pedoman dalam penanganan berbagai potensi bencana maupun gangguan operasional yang dapat terjadi. Melalui pelaksanaan aktivitas dalam kerangka *Business Continuity Management* (BCM) tersebut, Bank Jatim secara rutin melakukan pemantauan terhadap informasi yang disampaikan oleh Badan Meteorologi, Klimatologi, dan Geofisika (BMKG), sehingga Bank Jatim dapat melakukan identifikasi risiko sejak tahap awal, memberikan peringatan dini (*early warning*), serta menyosialisasikan informasi tersebut kepada seluruh pegawai agar senantiasa meningkatkan kewaspadaan terhadap kemungkinan terjadinya bencana.

Bank Jatim juga telah melaksanakan pengukuran Climate Risk Management System (CRMS) yang merupakan pengukuran emisi yang bersumber dari aktivitas nasabah pembiayaan. Pendekatan yang digunakan dalam proses penghitungan emisi nasabah pembiayaan mengacu pada estimasi emisi gas rumah kaca (GRK) yang mencakup cakupan 1, dan cakupan 2. Data

## d. Monitoring and Reporting

Risk monitoring aims to evaluate risk exposure on an ongoing basis and improve the reporting process if there are changes in the Bank's business activities, products, transactions, risk factors, information technology, and risk management information systems is material. These risks are monitored and reported regularly to ensure that they are within the Bank's risk appetite.

In the framework of the three lines of defense, Bank Jatim implements a clear division of roles in risk management, including climate-related risks. The first line, namely the business and operational units, is responsible for identifying, assessing, and managing risks arising from operational activities and credit distribution, among others through the implementation of Risk Control Self-Assessment. The second line, comprising the Risk Management Unit (RMU) and the compliance function, is responsible for formulating policies, conducting monitoring, and ensuring that risk management, including climate risk, is aligned with the Bank's risk management framework and risk appetite. Meanwhile, the third line, namely the Internal Audit Unit (IAU), performs an independent assurance function to evaluate the effectiveness of internal control and risk management implementation comprehensively.

In the process of identifying and managing climate risk, there is a possibility of risks arising from increasingly extreme climate change conditions. One form of impact from such conditions is extreme weather variability that may trigger hydrometeorological disasters, such as heavy rainfall, landslides, strong winds, prolonged drought, hail, and flooding. Therefore, the Bank has implemented a Business Continuity Management (BCM) framework as a guideline for handling various potential disasters and operational disruptions. Through the implementation of BCM activities, Bank Jatim regularly monitors information issued by the Meteorology, Climatology, and Geophysics Agency (BMKG), enabling the Bank Jatim to conduct early risk identification, provide early warnings, and disseminate information to all employees to enhance preparedness against potential disasters.

Bank Jatim has also implemented a Climate Risk Management System (CRMS) measurement, which measures emissions from financing customer activities. The approach used in calculating financing customer emissions refers to estimated greenhouse gas (GHG) emissions covering Scope 1 and Scope 2. The data and information used in these

dan informasi yang digunakan dalam pengukuran tersebut disesuaikan dengan ketersediaan data berdasarkan klasifikasi Tier 4.

Dewan Komisaris dan Direksi senantiasa menjalankan fungsi pengawasan aktif atas penerapan manajemen risiko terhadap seluruh aktivitas operasional dan strategis Bank. Dalam rangka mendukung penerapan Manajemen Risiko secara efektif, Direksi secara aktif terlibat dalam Komite Manajemen Risiko serta pembentukan Komite dalam struktur Dewan Komisaris seperti Komite Pemantau Risiko dan Komite Audit.

Dalam menjalankan fungsi penerapan Manajemen Risiko secara efektif, Direksi memperoleh dukungan dari Satuan Kerja Manajemen Risiko (SKMR) yang bertanggung jawab melaksanakan berbagai tahapan pengelolaan risiko, mulai dari proses identifikasi risiko, pengukuran tingkat risiko, pelaksanaan mitigasi risiko, hingga pengendalian risiko. Dalam pelaksanaan tugasnya, Satuan Kerja Manajemen Risiko (SKMR) secara berkala menyusun Laporan Evaluasi Risiko yang disusun setiap 3 (tiga) bulan sekali. Laporan tersebut kemudian disampaikan kepada berbagai tingkatan manajemen di dalam organisasi, termasuk kepada Dewan Komisaris, serta dilaporkan kepada pihak eksternal yang berwenang seperti Otoritas Jasa Keuangan.

## Cakupan dan Frekuensi Audit [FS9]

Satuan kerja Audit Internal (SKAI) Bank Jatim bertanggung jawab untuk melaksanakan evaluasi serta berperan aktif dalam meningkatkan efektivitas pelaksanaan keuangan berkelanjutan secara berkala di seluruh unit kerja. Satuan Kerja Audit Internal (SKAI) melakukan fungsi *assurance* terhadap debitur yang bidang usahanya memiliki potensi dampak negatif terhadap lingkungan dengan melakukan pengecekan dokumen terkait ramah lingkungan, untuk memastikan bahwa debitur telah memenuhi peraturan perundang-undangan yang berlaku. Audit dilakukan dengan metode *sampling* dengan pendekatan *Risk Based Audit*, yaitu pendekatan audit yang dimulai dengan proses penilaian risiko audit (*risk profile*), sehingga dalam perencanaan, pelaksanaan dan pelaporan auditnya lebih difokuskan pada area penting yang berisiko tinggi. Metode pengambilan *sampling* menggunakan pendekatan metode *Judgmental Sampling* dengan memperhatikan populasi dan historis permasalahan.

Teknik audit yang dilakukan untuk memperoleh bahan pembuktian yang relevan dalam rangka membandingkan keadaan yang ada (kondisi) dengan keadaan yang seharusnya (kriteria) antara lain *substantive test* atas laporan keuangan, wawancara, verifikasi, analisa, trasir, rekonsiliasi, inspeksi dan bila diperlukan dapat dilakukan konfirmasi kepada pihak ketiga (Notaris, KJPP, KAP, *Bouwheer*, dan lainnya).

measurements are adjusted based on data availability based on the Tier 4 classification.

The Board of Commissioners and the Board of Directors consistently exercise an active oversight role over the implementation of risk management across all operational and strategic activities of the Bank. To support the effective implementation of Risk Management, the Board of Directors is actively involved in the Risk Management Committee and has established committees within the Board of Commissioners structure, such as the Risk Monitoring Committee and the Audit Committee.

To effectively implement Risk Management, the Board of Directors receives support from the Risk Management Work Unit (SKMR), which is responsible for implementing various stages of risk management, from risk identification and risk measurement to risk mitigation and risk control. In carrying out its duties, the Risk Management Work Unit (SKMR) periodically prepares a Risk Evaluation Report, which is prepared every three months. The report is then submitted to various levels of management within the organization, including the Board of Commissioners, and reported to authorized external parties such as the Financial Services Authority.]

## Scope and Frequency of Audits [FS9]

Bank Jatim's Internal Audit Unit (SKAI) is responsible for conducting evaluations and playing an active role in improving the effectiveness of sustainable finance implementation periodically in all work units. The Internal Audit Work Unit (SKAI) performs an assurance function for debtors whose business fields have a potential negative impact on the environment by checking documents related to environmental friendliness, to ensure that debtors have complied with applicable laws and regulations. The audit is conducted using a sampling method with a Risk-Based Audit approach, which begins with an audit risk assessment process (risk profile). This ensures that audit planning, execution, and reporting focus more on high-risk and critical areas. The sampling method applied is the Judgmental Sampling approach, taking into account the population and historical issues.

The audit techniques used to obtain relevant evidence in order to compare the actual conditions (condition) with the expected conditions (criteria) include substantive testing of financial statements, interviews, verification, analysis, tracing, reconciliation, inspection, and, if necessary, confirmation with third parties (Notary, Public Appraisal Office/KJPP, Public Accounting Firm/KAP, *Bouwheer*, and others).

To ensure that stakeholder engagement is conducted effectively, Bank Jatim employs various engagement mechanisms tailored to the specific needs of each stakeholder group, as outlined in the table above. These mechanisms also function as communication channels through which the Bank receives, evaluates, and responds to stakeholder concerns and issues relating to environmental, social, and governance (ESG) matters.

## Permasalahan Terhadap Penerapan Keuangan Berkelanjutan [OJK E.5]

### Problems with the Development of Sustainable Development

Dalam penerapan keuangan berkelanjutan, Bank Jatim masih menemui berbagai tantangan yang bersumber dari faktor internal Bank, antara lain:

1. Pengembangan Kapasitas Internal: Bank Jatim dalam memenuhi target penyelenggaraan pelatihan internal seperti *In House Training Sustainable Finance Awareness* belum tercapai sepenuhnya.
2. Penyaluran Kredit Berbasis Keberlanjutan: realisasi penyaluran kredit tersebut belum mencapai target yang ditetapkan. Hal ini menunjukkan perlunya strategi lebih lanjut dalam mendorong pembiayaan ke sektor-sektor ramah lingkungan.
3. Konsolidasi Proses Bisnis: Bank Jatim memerlukan waktu dan upaya yang signifikan untuk memastikan seluruh elemen organisasi selaras dengan prinsip keuangan berkelanjutan.
4. Pemahaman dan Implementasi Prinsip Keberlanjutan: Masih terdapat kebutuhan untuk meningkatkan pemahaman mendalam serta penerapan prinsip-prinsip keuangan berkelanjutan di seluruh jajaran internal Bank. Langkah serius telah diambil dengan membentuk Tim Rencana Aksi Keuangan Berkelanjutan, namun implementasi di lapangan memerlukan komitmen dan adaptasi dari seluruh karyawan.

Atas berbagai tantangan internal yang dihadapi, Bank Jatim telah melakukan berbagai upaya mitigasi atas tantangan tersebut yaitu dengan:

1. Meningkatkan Frekuensi Pelatihan dengan menjadwalkan pelatihan rutin dan wajib bagi seluruh karyawan, khususnya bagi yang terlibat langsung dalam pembiayaan berkelanjutan.
2. Melakukan kolaborasi dengan pihak eksternal yaitu menggandeng Otoritas Jasa Keuangan, Bank Indonesia, dan Lembaga Swadaya Masyarakat (LSM) lingkungan untuk memberikan pelatihan yang lebih mendalam serta mengundang pakar ESG (*Environmental, Social, Governance*) sebagai mentor bagi tim internal.
3. Sertifikasi dan Insentif: Bank Jatim memberikan sertifikasi khusus bagi karyawan yang telah menyelesaikan pelatihan keuangan berkelanjutan serta menyediakan insentif atau penghargaan bagi karyawan yang berhasil menerapkan konsep sustainable finance dalam pekerjaannya.
4. Penguatan Kebijakan Kredit Berkelanjutan
5. Pengembangan Produk Keuangan Berkelanjutan
6. Kemitraan dengan Lembaga Keuangan dan Pemerintah
7. Integrasi Keberlanjutan dalam Struktur Organisasi

In implementing sustainable finance, Bank Jatim still faces internal challenges, including:

1. Internal Capacity Development: The bank has not yet fully achieved its target for internal training programs, such as the In-House Training on Sustainable Finance Awareness.
2. Sustainable Credit Distribution: The realization of sustainable credit disbursement has not yet met the set targets, indicating the need for further strategies to drive financing in environmentally friendly sectors.
3. Business Process Consolidation: Significant time and effort are required to ensure that all organizational elements align with sustainable finance principles.
4. Understanding and Implementing Sustainability Principles: There is still a need to enhance in-depth understanding and application of sustainable finance principles across all internal levels. While a Sustainable Finance Action Plan Team has been established, effective implementation requires commitment and adaptation from all employees.

To address various internal challenges, Bank Jatim has implemented several mitigation efforts, including:

1. Increasing Training Frequency by scheduling regular and mandatory training for all employees, especially those directly involved in sustainable financing.
2. Collaboration with External Parties by partnering with the Financial Services Authority (OJK), Bank Indonesia, and environmental NGOs to provide more in-depth training and inviting ESG (Environmental, Social, and Governance) experts as mentors for the internal team.
3. Certification and Incentives: Providing special certification for employees who complete sustainable finance training and offering incentives or rewards for those who successfully implement sustainable finance concepts in their work.
4. Strengthening Sustainable Credit Policies

Selain, tantangan dari internal, Bank juga menghadapi tantangan yang berasal dari eksternal Bank di antaranya:

1. Kurangnya Literasi dan Kesadaran Masyarakat tentang Keuangan Berkelanjutan: Banyak nasabah dan pelaku usaha yang belum memahami pentingnya praktik keuangan berkelanjutan, sehingga minat terhadap produk dan layanan ramah lingkungan masih rendah.
2. Ekosistem Pendukung yang Belum Optimal: Keterbatasan infrastruktur dan dukungan dari berbagai pihak, seperti pemerintah daerah dan lembaga keuangan lainnya, menghambat pengembangan produk keuangan hijau dan penyaluran kredit ke sektor-sektor ramah lingkungan.
3. Kondisi Sosial dan Budaya: Preferensi masyarakat yang masih terbiasa dengan praktik perbankan konvensional menjadi tantangan dalam mengedukasi dan mengalihkan mereka ke layanan perbankan yang berkelanjutan.
4. Dinamika Lingkungan dan Perubahan Iklim: Perubahan kondisi lingkungan dan iklim dapat mempengaruhi portofolio kredit Bank Jatim, terutama jika debitur terdampak oleh bencana alam atau perubahan iklim yang ekstrem.
5. Ketentuan Regulator yang Berubah: Perubahan kebijakan dan regulasi terkait keuangan berkelanjutan memerlukan penyesuaian cepat dari Bank Jatim, baik dalam hal operasional maupun kepatuhan terhadap standar baru.

2. Suboptimal Supporting Ecosystem: Limited infrastructure and support from various parties, such as local governments and other financial institutions, hinder the development of green financial products and the distribution of credit to environmentally friendly sectors.
3. Social and Cultural Conditions: People's preference for conventional banking practices poses a challenge in educating and transitioning them to sustainable banking services.

## Praktik Pengadaan Barang dan Jasa Procurement Practices for Goods and Services

Dalam rangka memperoleh barang dan jasa dengan kualitas terbaik serta sesuai dengan kriteria dan spesifikasi yang telah ditetapkan, seluruh pemasok yang menjadi mitra kerja Bank Jatim diwajibkan untuk memenuhi persyaratan serta kebijakan umum yang telah ditentukan. Ketentuan tersebut diatur dalam Surat Keputusan Direksi Nomor 060/03/34/DIR/UMM/KEP tanggal 4 Oktober 2021 tentang Standard Operating Procedure (SOP) Pengadaan Barang/Jasa, serta Surat Keputusan Direksi Nomor 063/03/08/DIR/UMM/KEP tanggal 7 Februari 2024 tentang Standard Operating Procedure (SOP) Vendor Management PT Bank Pembangunan Daerah Jawa Timur Tbk. Selain itu, Bank Jatim secara konsisten memastikan bahwa setiap pemasok telah mematuhi seluruh ketentuan peraturan perundang-undangan yang berlaku dalam menjalankan kegiatan usahanya, termasuk berbagai ketentuan yang berkaitan dengan aspek lingkungan dan sosial.

Proses pemilihan penyedia dalam pengadaan barang dan jasa merupakan tahapan penting untuk memastikan bahwa perusahaan memperoleh penyedia yang kompeten, legal, serta mampu memenuhi kebutuhan pekerjaan secara efektif. Prosedur ini umumnya dimulai dari identifikasi kebutuhan hingga penetapan vendor terpilih melalui beberapa tahapan evaluasi.

Tahap pertama adalah identifikasi kebutuhan pengadaan. Pada tahap ini unit kerja yang membutuhkan barang atau jasa menyusun spesifikasi kebutuhan secara rinci, meliputi jenis barang atau jasa, jumlah atau volume, standar kualitas, serta estimasi waktu pelaksanaan. Informasi tersebut menjadi dasar bagi tim pengadaan dalam menentukan jenis vendor yang dibutuhkan serta kriteria seleksi yang akan digunakan.

Tahap berikutnya adalah pencarian dan pengumpulan calon vendor yang dilakukan oleh Manajemen Vendor. Manajemen vendor melakukan pencarian calon penyedia melalui VMS (*vendor management system*) yang sudah dimiliki perusahaan. Data vendor yang akan diikutkan dalam pengadaan barang dan jasa khususnya metode pengadaan langsung bisa merupakan RFI (*request for information*) dari inisiator pada saat pembuatan Harga Perkiraan Sendiri (HPS) dan juga gabungan dari data di VMS.

In order to obtain goods and services of the highest quality in accordance with the established criteria and specifications, all suppliers partnering with Bank Jatim are required to comply with the specified requirements and general policies. These provisions are regulated under the Board of Directors Decree No. 060/03/34/DIR/UMM/KEP dated October 4, 2021 concerning the Standard Operating Procedure (SOP) for Procurement of Goods/Services, as well as the Board of Directors Decree No. 063/03/08/DIR/UMM/KEP dated February 7, 2024 concerning the Standard Operating Procedure (SOP) for Vendor Management of PT Bank Pembangunan Daerah Jawa Timur Tbk. In addition, Bank Jatim consistently ensures that all suppliers comply with applicable laws and regulations in conducting their business activities, including provisions related to environmental and social aspects.

The vendor selection process in the procurement of goods and services is a critical stage to ensure that the Company engages providers who are competent, legally compliant, and capable of effectively meeting operational requirements. This process generally begins with the identification of needs and concludes with the appointment of selected vendors through several evaluation stages.

The first stage is the identification of procurement needs. At this stage, the requesting unit prepares detailed specifications, including the type of goods or services required, quantity or volume, quality standards, and estimated implementation timeline. This information serves as the basis for the procurement team in determining the type of vendor required as well as the selection criteria to be applied.

The next stage is the search and collection of potential vendors, conducted by Vendor Management. Vendor management searches for potential suppliers through the company's existing vendor management system (VMS). Vendor data to be included in the procurement of goods and services, particularly for direct procurement methods, can be derived from RFIs (*request for information*) from the initiator when creating the Own Estimated Price (HPS) and also from a combination of data from the VMS.

Selanjutnya dilakukan evaluasi administratif dan legalitas perusahaan. Pada tahap ini tim pengadaan memverifikasi kelengkapan dan keabsahan dokumen perusahaan, seperti Nomor Induk Berusaha (NIB), akta pendirian dan perubahannya, Nomor Pokok Wajib Pajak (NPWP), serta dokumen perizinan lainnya. Salah satu aspek penting yang diperhatikan adalah kesesuaian Klasifikasi Baku Lapangan Usaha Indonesia (KBLI) yang tercantum dalam izin usaha dengan jenis barang atau jasa yang akan diadakan. Vendor yang memiliki KBLI yang relevan dianggap memiliki legalitas dan kompetensi usaha yang sesuai dengan ruang lingkup pekerjaan yang akan dilaksanakan. Disamping itu juga dilakukan pengecekan SLIK OJK / BI Checking terhadap perusahaan dan juga pengurusnya agar melihat kemampuan financial dan karakter dari penyedia barang dan jasa.

Setelah lolos tahap administrasi, dilakukan evaluasi kemampuan dan pengalaman vendor. Penilaian difokuskan pada kemampuan teknis perusahaan dan rekam jejak pekerjaan sebelumnya. Salah satu indikator utama adalah pengalaman dalam pengadaan atau proyek sejenis, yang dapat dibuktikan melalui kontrak kerja, daftar proyek, atau referensi dari klien sebelumnya. Pengalaman ini menunjukkan tingkat kompetensi vendor dalam melaksanakan pekerjaan yang memiliki karakteristik yang sama atau serupa dengan kebutuhan perusahaan.

Selain pengalaman, perusahaan juga menilai kapasitas teknis dan sumber daya yang dimiliki vendor, seperti tenaga kerja yang kompeten, peralatan pendukung, serta sistem manajemen yang digunakan dalam menjalankan pekerjaan. Evaluasi ini bertujuan memastikan bahwa vendor memiliki kemampuan operasional yang memadai untuk menyelesaikan pekerjaan sesuai spesifikasi yang ditetapkan.

Tahap selanjutnya adalah evaluasi teknis dan harga terhadap penawaran vendor. Penawaran tersebut kemudian dievaluasi dengan mempertimbangkan kesesuaian spesifikasi teknis, metode pelaksanaan pekerjaan, jadwal pelaksanaan, serta nilai biaya yang diajukan. Perusahaan berupaya memilih vendor yang mampu memberikan kombinasi terbaik antara kualitas, kemampuan pelaksanaan, dan harga yang kompetitif.

Subsequently, an administrative and legal evaluation of the companies is conducted. At this stage, the procurement team verifies the completeness and validity of corporate documents, such as the Business Identification Number (NIB), deed of establishment and its amendments, Taxpayer Identification Number (NPWP), and other relevant licensing documents. One of the key aspects assessed is the alignment of the Indonesian Standard Industrial Classification (KBLI) stated in the business license with the type of goods or services to be procured. Vendors with relevant KBLI classifications are considered to possess appropriate legal standing and business competence in line with the scope of work to be performed. In addition, a creditworthiness check is conducted through the Financial Information Service System (SLIK) of the Financial Services Authority/Bank Indonesia (OJK/BI Checking) on both the company and its management to assess financial capacity and integrity..

Upon passing the administrative stage, an evaluation of the vendor's capabilities and experience is carried out. This assessment focuses on the company's technical competence and track record of previous projects. One of the main indicators is experience in similar procurement or projects, which can be demonstrated through work contracts, project lists, or references from previous clients. Such experience reflects the vendor's level of competence in executing work with characteristics similar to the Company's requirements.

In addition to experience, the Company also evaluates the vendor's technical capacity and available resources, including qualified personnel, supporting equipment, and management systems used in executing the work. This evaluation aims to ensure that the vendor possesses sufficient operational capability to complete the work in accordance with the specified requirements.

The next stage involves the technical and commercial evaluation of vendor proposals. The submitted proposals are assessed based on their compliance with technical specifications, proposed work methodologies, implementation schedules, and the proposed cost. The Company seeks to select vendors that offer the best combination of quality, execution capability, and competitive pricing.

Apabila diperlukan, dilakukan klarifikasi dan negosiasi dengan vendor untuk memastikan kesesuaian informasi yang disampaikan serta memperoleh kesepakatan terbaik terkait aspek teknis maupun komersial. Setelah proses evaluasi selesai, tim pengadaan menyusun rekomendasi vendor yang dinilai paling memenuhi kriteria.

Tahap terakhir adalah penetapan vendor terpilih dan penyusunan kontrak kerja. Vendor yang memperoleh nilai evaluasi terbaik ditetapkan sebagai pemenang pengadaan setelah mendapat persetujuan dari pihak manajemen. Selanjutnya dilakukan penandatanganan kontrak atau penerbitan *purchase order* sebagai dasar pelaksanaan pekerjaan dilakukan bersama dengan inisiator pekerjaan.

Where necessary, clarification and negotiation are conducted with vendors to ensure the accuracy of the information provided and to obtain the most favorable agreement on both technical and commercial aspects. Upon completion of the evaluation process, the procurement team prepares a recommendation identifying the vendor that best meets the established criteria.

The final stage is the appointment of the selected vendor and the preparation of the contract. The vendor achieving the highest evaluation score is designated as the procurement winner upon approval from management. This is followed by the signing of a contract or the issuance of a purchase order as the basis for the execution of the work, carried out in coordination with the initiating unit.

## Sustainability Performance

### Overview [OJK F]

## Kegiatan Membangun Budaya Keberlanjutan [OJK F.1] Activities to Build A Culture of Sustainability

Dalam upaya mendukung pembangunan berkelanjutan, Bank Jatim berkomitmen untuk menerapkan nilai-nilai keberlanjutan tidak hanya dalam aspek operasionalnya, tetapi juga dalam menciptakan nilai integritas dan budaya keberlanjutan di lingkungan kerja. Sebagai bagian dari inisiatif keberlanjutan, Bank Jatim secara aktif menanamkan nilai-nilai keberlanjutan kepada seluruh karyawan dan *stakeholder*. Salah satunya adalah dengan memberikan himbauan terkait penghematan energi, seperti mematikan lampu dan alat elektronik yang tidak digunakan, serta penggunaan air secara bijaksana. Selain itu, Bank Jatim juga mendorong pengurangan kunjungan dan pertemuan fisik melalui pemanfaatan teknologi informasi yang lebih efisien. Hal ini tidak hanya berkontribusi terhadap penghematan sumber daya alam, tetapi juga mendukung upaya mitigasi perubahan iklim dan peningkatan efisiensi operasional perusahaan.

Selain itu, Bank Jatim juga terus berupaya untuk menerapkan budaya perusahaan yang lebih *paperless* di seluruh level perusahaan. Bank Jatim mengoptimalkan penggunaan kertas bekas yang tidak bersifat rahasia untuk digunakan kembali (*reuse*) pada sisi lainnya yang masih kosong untuk keperluan-keperluan internal. Sebagai upaya untuk mengurangi penggunaan kertas, Bank Jatim merilis himbauan terkait pentingnya melakukan pengecekan secara optimal sebelum naskah dicetak, yang bertujuan agar terhindar dari kemungkinan harus mencetak ulang karena kesalahan pengetikan dokumen. Berdasarkan upaya yang telah dilakukan, dapat dilihat bahwa Bank Jatim berhasil melakukan penurunan penggunaan kertas menjadi sebesar 2.002 rim di tahun 2025, menurun dibandingkan tahun 2024 yang sebesar 2.017.

**Tabel Penggunaan Kertas**  
Table of Paper Usage

(Dalam Rim / In Ream)

2025	2024	2023
2.002	2.017	2.035

Bank Jatim juga memanfaatkan teknologi digital sebagai bagian dari upaya untuk mengurangi penggunaan kertas, salah satunya dengan mengimplementasikan e-filing. Dengan sistem e-filing, dokumen dan data dapat disimpan, dikelola, dan diakses secara elektronik tanpa perlu mencetaknya. Hal ini tidak hanya mengurangi penggunaan kertas, tetapi juga meningkatkan efisiensi dalam hal pengelolaan arsip dan dokumen. Selain itu, e-filing memungkinkan akses yang lebih cepat dan aman terhadap informasi yang diperlukan, sekaligus mendukung transformasi digital di Bank Jatim. Dengan penerapan sistem ini, Bank Jatim berhasil mengurangi ketergantungan pada dokumen fisik dan memperkuat komitmennya terhadap praktik bisnis yang lebih ramah lingkungan.

In support of sustainable development, Bank Jatim is committed to integrating sustainability values not only into its operational activities but also into the promotion of integrity and the cultivation of a sustainability-oriented culture within the workplace. As part of its sustainability initiatives, Bank Jatim actively instills these values among employees and stakeholders. One approach is by promoting energy conservation practices, such as turning off unused lights and electronic devices, as well as using water wisely. Additionally, Bank Jatim encourages the reduction of physical visits and meetings by leveraging more efficient information technology. These efforts not only contribute to the conservation of natural resources but also support climate change mitigation and enhance the company's operational efficiency.

Additionally, Bank Jatim continues to promote a more paperless corporate culture across all levels of the company. The bank optimizes the reuse of non-confidential paper by utilizing the blank side for internal purposes. To further reduce paper usage, Bank Jatim has issued recommendations emphasizing the importance of thoroughly reviewing documents before printing to avoid unnecessary reprints due to typographical errors. Based on the initiatives undertaken, it can be observed that Bank Jatim successfully reduced paper usage to 2,002 reams in 2025, a decrease compared to 2,017 reams in 2024.

Bank Jatim also leverages digital technology as part of its efforts to reduce paper usage, one of which is through the implementation of an e-filing system. Through the e-filing system, documents and data can be stored, managed, and accessed electronically without the need for printing. This initiative not only reduces paper consumption but also improves efficiency in archive and document management. Additionally, E-Filing enables faster and more secure access to necessary information while supporting Bank Jatim's digital transformation. Through this system, Bank Jatim has successfully reduced reliance on physical documents and reinforced its commitment to more environmentally friendly business practices.

## Aspek Material

### Penggunaan Material yang Ramah Lingkungan [OJK F.5]

Dalam menjalankan kegiatan usahanya, PT Bank Pembangunan Daerah Jawa Timur Tbk menunjukkan komitmen dalam mendukung pelestarian lingkungan melalui pemanfaatan teknologi digital, antara lain melalui layanan Jatim Kilat dan *E-Filing*. Penggunaan teknologi digital tersebut memungkinkan aktivitas operasional perusahaan menjadi lebih efisien dan mendorong penerapan konsep paperless dalam berbagai proses kerja. Selain itu, Bank Jatim juga memanfaatkan mesin pemindai yang terintegrasi dengan mesin fotokopi dan dapat langsung terhubung dengan komputer maupun laptop, serta terkoneksi dengan jaringan wifi dan hotspot. Pemanfaatan perangkat tersebut membantu mengurangi kebutuhan penggunaan kertas untuk keperluan fotokopi dan mendukung praktik operasional yang lebih ramah lingkungan.

Selain itu, untuk menunjang aktivitas operasioalnya, Bank Jatim telah melakukan penggantian lampu LED sebagai penerangan gedung karena material yang digunakan pada lampu tersebut lebih ramah lingkungan, menggunakan *refrigerant* yang ramah lingkungan (seperti R32, R410A atau R407C) untuk AC dan kulkas, serta APAR yang ramah lingkungan (HFC236FA, atau APAR Cleant Agent CF-21) yang digunakan untuk pemadam api. Penggunaan refrigeran atau pemadam api, Bank Jatim telah menggunakan senyawa yang ramah lingkungan dan tidak merusak lapisan ozon. Bank Jatim juga telah mewajibkan seluruh karyawannya untuk minum dengan menggunakan *tumbler* masing-masing dan gelas yang disediakan oleh Bank Jatim, sehingga dapat mengurangi limbah plastik.

## Material Aspect

### Use of Environmentally Friendly Materials [OJK F.5]

In conducting its business activities, PT Bank Pembangunan Daerah Jawa Timur Tbk demonstrates its commitment to supporting environmental preservation through the utilization of digital technology, including services such as Jatim Kilat and *E-Filing*. The use of these digital technologies enables the Company's operational activities to become more efficient and promotes the implementation of a paperless concept across various work processes. In addition, Bank Jatim utilizes scanning devices integrated with photocopy machines, which can be directly connected to computers or laptops and are equipped with Wi-Fi and hotspot connectivity. The use of such devices helps reduce the need for paper in photocopying activities and supports more environmentally friendly operational practices.

In addition, to support its operational activities, Bank Jatim has replaced LED lights as building lighting because the materials used in the lights are more environmentally friendly, using environmentally friendly refrigerants (such as R32, R410A or R407C) for AC and refrigerators, and environmentally friendly APAR (HFC236FA, or APAR Cleant Agent CF-21) used for fire extinguishers. The use of refrigerants or fire extinguishers, Bank Jatim has utilized environmentally friendly substances that do not deplete the ozone layer. In addition, Bank Jatim requires all employees to use personal tumblers and glasses provided by the Bank for drinking purposes, thereby reducing plastic waste.

## Aspek Energi

### Jumlah dan Intensitas Energi yang Digunakan [OJK F.6, GRI 302-1, 302-2, 302-3]

Dalam menjalankan aktivitas bisnisnya, Bank Jatim memanfaatkan dua sumber energi utama, yaitu bahan bakar minyak (BBM) dan energi listrik yang dipasok oleh pihak ketiga. BBM digunakan untuk mendukung operasional kendaraan dinas serta pengoperasian generator set (genset) sebagai sumber energi cadangan apabila terjadi pemadaman listrik di wilayah operasional Bank Jatim. Sementara itu, energi listrik digunakan untuk menunjang operasional gedung, antara lain untuk penggunaan komputer, laptop, lift, mesin fotokopi, sistem pengatur suhu ruangan, serta peralatan operasional lainnya. Sampai dengan akhir Desember 2025, Bank Jatim tidak mengonsumsi dan menjual uap, pendingin, dan pemanas, serta tidak menjual listrik. Bank Jatim juga belum menggunakan energi terbarukan sampai dengan akhir tahun 2025.

Metode penghitungan BBM dan listrik dihitung dengan menjumlahkan seluruh total pemakaian dalam tahun pelaporan yang kemudian dikonversi ke dalam gigajoule. Sepanjang tahun 2025, intensitas pemakaian energi di kantor pusat yaitu sebesar 11,17 gigajoule/karyawan menurun dibandingkan dengan tahun 2024 yang sebesar 14,07 gigajoule/karyawan yang dirinci sebagai berikut.

**Tabel Intensitas Pemakaian Energi Kantor Pusat**

## Energy Aspect

### Amount of Intensity of Energy Used [OJK F.6, GRI 302-1, 302-2, 302-3]

In conducting its business activities, Bank Jatim utilizes two main energy sources, namely fuel oil (BBM) and electricity supplied by third parties. Fuel oil is used to support the operation of official vehicles and the operation of generator sets (gensets) as a backup energy source in the event of power outages in Bank Jatim's operational areas. Meanwhile, electricity is used to support building operations, including the use of computers, laptops, elevators, photocopiers, air conditioning systems, and other operational equipment. As of the end of December 2025, Bank Jatim does not consume or sell steam, cooling, or heating, and does not sell electricity. Bank Jatim has also not utilized renewable energy as of the end of 2025.

The calculation method for fuel oil and electricity is based on the total consumption during the reporting year, which is then converted into gigajoules. Throughout 2025, energy consumption intensity at the head office was 11.17 gigajoules per employee, a decrease compared to 14.07 gigajoules per employee in 2024, as detailed below.

Bank Jatim juga telah melakukan pengukuran terhadap energi yang terkait dengan aktivitas perjalanan dinas yang dilakukan oleh para karyawannya. Energi yang digunakan di luar organisasi dihitung dengan menggunakan pendekatan berbasis biaya, yaitu dengan membagi total biaya yang dikeluarkan untuk perjalanan dinas menggunakan pesawat terbang dengan harga avtur pada tahun yang bersangkutan. Selanjutnya, konsumsi avtur yang diperoleh dalam satuan kiloliter dikonversi menjadi gigajoule sesuai dengan pedoman yang tercantum dalam SEOJK 16/2021, dengan merujuk pada metodologi The Greenhouse Gas Protocol Initiative, 2004. Berdasarkan perhitungan tersebut, diperoleh data mengenai jumlah serta intensitas pemakaian energi di luar operasional Bank Jatim, yang disajikan sebagai berikut.

Bank Jatim has also conducted measurements of energy associated with employee business travel activities. Energy consumption outside the organization is calculated using a cost-based approach, by dividing the total expenditure on business travel by air transportation by the aviation fuel price applicable in the respective year. The resulting aviation fuel consumption, expressed in kiloliters, is then converted into gigajoules in accordance with the guidelines set forth in SEOJK 16/2021, referring to the methodology of The Greenhouse Gas Protocol Initiative, 2004. Based on these calculations, data on the total and intensity of energy consumption outside Bank Jatim's operational activities have been obtained and are presented as follows.

### Upaya dan Pencapaian Efisiensi Energi dan Penggunaan Energi Terbarukan [OJK F.7, F.12, GRI 302-4, 302-5]

Energi yang dimanfaatkan untuk mendukung aktivitas operasional Bank tergolong sebagai energi tidak terbarukan, sehingga ketersediaannya bersifat terbatas. Oleh karena itu, Bank Jatim berkomitmen untuk melakukan efisiensi dalam penggunaan energi sebagai bentuk dukungan nyata terhadap Instruksi Presiden Republik Indonesia Nomor 13 Tahun 2011 tentang Penghematan Energi dan Air, serta Peraturan Menteri Energi dan Sumber Daya Mineral Republik Indonesia Nomor 13 Tahun 2012 tentang Penghematan Pemakaian Tenaga Listrik. Selain sebagai bentuk kepatuhan terhadap ketentuan yang berlaku, upaya efisiensi penggunaan energi juga bertujuan untuk menurunkan intensitas emisi gas rumah kaca (GRK) yang dihasilkan dari kegiatan operasional. Adapun langkah-langkah efisiensi penggunaan energi yang dilaksanakan oleh Bank Jatim adalah sebagai berikut.

1. Mematikan seluruh lampu penerangan ruang kerja dan ruang rapat jika seluruh pegawai pada lantai tersebut telah meninggalkan kantor.
2. Mematikan penerangan pada ruang rapat jika tidak dipergunakan dan membuka tirai jendela secukupnya.
3. Mematikan lampu ruangan jika akan meninggalkan ruangan dalam waktu cukup lama.
4. Menyalakan lampu kamar mandi secukupnya.
5. Pengaturan pencahayaan untuk ruangan kantor dan gedung yang terpantau, tidak berlebih-lebihan dan secukupnya.
6. Mematikan unit AC seluruh gedung setelah jam operasional selesai.
7. Mematikan lampu di seluruh ruang kerja setelah operasional selesai.
8. Pemeliharaan unit AC secara berkala.
9. Pengecekan panel maupun instalasi listrik.
10. Mengganti lampu menggunakan LED.
11. Mengurangi kunjungan dan pertemuan/rapat fisik atau tatap muka langsung dengan cara video atau *call conference*. Walaupun pandemi COVID-19 sudah tertangani, kebijakan rapat dengan memanfaatkan aplikasi teknologi informasi ini tetap diteruskan untuk jenis rapat tertentu.

### Efforts and Achievements of Energy Efficiency and Use of Renewable Energy [OJK F.7, F.12, GRI 302-4, 302-5]

The energy used to support the Bank's operational activities is a non-renewable energy category so its availability is very limited. Therefore, Bank Jatim is committed to carrying out efficiency in energy use which is a form of Bank Jatim's compliance with the Presidential Instruction of the Republic of Indonesia Number 13 of 2011 concerning Energy and Water Savings, and the Regulation of the Minister of Energy and Mineral Resources of the Republic of Indonesia Number 13 of 2012 concerning Savings in Electricity Use. In addition to complying with applicable regulations, efforts to improve energy efficiency are also aimed at reducing the intensity of greenhouse gas (GHG) emissions generated from operational activities. The energy efficiency measures implemented by Bank Jatim are as follows.

1. Turning off all lighting in workspaces and meeting rooms when all employees on that floor have left the office.
2. Turning off the lighting in the meeting room when it is not in use and opening the window blinds sufficiently
3. Turning off the room lights when you leave the room for a long time
4. Turning on the bathroom light sufficiently.
5. Lighting settings for monitored office rooms and buildings are not excessive and in moderation
6. Turning off the AC units throughout the building after operational hours are over.
7. Turning off the lights in all workspaces after operations are over.
8. Periodic maintenance of the AC units.
9. Checking panels and electrical installations
10. Replacing lamps with LED.
11. Reducing physical visits and meetings/gatherings or faceto- face through video or conference calls. Even though the COVID-19 pandemic has been handled, the meeting policy of utilizing information technology applications is still applied for certain types of meetings.

Bank Jatim telah menetapkan *baseyear* dalam pengukuran energi yaitu tahun 2024 dan *baseline* sebesar 14.563,28 gigajoule yang bertujuan untuk mengukur efektivitas upaya efisiensi penggunaan energi. Sepanjang tahun 2025, Bank Jatim menggunakan energi sebesar 13.537,29 gigajoule. Oleh karenanya, outcome dari upaya pengurangan energi yang dilakukan Bank yaitu penurunan penggunaan energi menjadi sebesar 13.537,29 gigajoule menurun dibandingkan tahun 2024 yang sebesar 14.563,28 gigajoule atau sebesar 6,8%. Namun demikian, di tahun 2025 tidak terdapat penurunan kebutuhan energi per produksi.

Bank Jatim has established 2024 as the base year for energy measurement, with a baseline of 14,563.28 gigajoules, aimed at assessing the effectiveness of energy efficiency initiatives. Throughout 2025, Bank Jatim consumed 13,537.29 gigajoules of energy. Accordingly, the outcome of the Bank's energy reduction initiatives was a decrease in total energy consumption to 13,537.29 gigajoules, down from 14,563.28 gigajoules in 2024, representing a reduction of 6.8%. However, in 2025, there was no reduction in energy intensity per production unit.

## Aspek Air

## Water Aspect

### Penggunaan Air [OJK F.8]

### Water Usage [OJK F.8]

Dalam melaksanakan berbagai kegiatan operasionalnya, Bank Jatim memanfaatkan air untuk berbagai kebutuhan, antara lain mencuci peralatan dapur, fasilitas toilet, wudhu, serta keperluan lainnya. Sumber air yang digunakan berasal dari pasokan pihak ketiga, yaitu PDAM. Menyadari keterbatasan ketersediaan air bersih, Bank Jatim berkomitmen untuk senantiasa melakukan pengelolaan dan penghematan air secara bertanggung jawab. Komitmen ini diwujudkan melalui pelaksanaan kampanye serta himbauan untuk menghemat penggunaan air, disertai dengan pengecekan rutin terhadap saluran, keran, dan katup (valve) air. Apabila ditemukan kebocoran atau kerusakan, Bank Jatim segera melakukan perbaikan agar penggunaan air tetap efisien dan berkelanjutan.

In carrying out its operational activities, Bank Jatim utilizes water for various purposes, including washing kitchen equipment, toilet facilities, ablution (wudhu), and other needs. The water supply is sourced from a third party, namely the regional water utility (PDAM). Recognizing the limited availability of clean water, Bank Jatim is committed to managing and conserving water responsibly. This commitment is implemented through campaigns and appeals to promote water conservation, accompanied by routine inspections of pipelines, faucets, and water valves. In the event of any leakage or damage, Bank Jatim promptly undertakes repairs to ensure that water usage remains efficient and sustainable.

Sepanjang tahun 2025, penggunaan air di untuk aktivitas operasional Bank Jatim mengalami peningkatan. Hal ini dikarenakan banyaknya renovasi yang dilakukan dalam rangka peremajaan tampilan di beberapa ruang Divisi dan Ruang Direksi serta adanya perbaikan selasar dan toilet di kantor pusat, penerapan 100% *work from office*, serta sebagian besar nasabah telah melakukan transaksinya secara langsung di Bank, sehingga berdampak pada penggunaan toilet Bank. Adapun penggunaan air sebagai berikut.

Throughout 2025, water usage for Bank Jatim's operational activities has increased. This was primarily due to the extensive renovations carried out to refurbish several Division offices and Directors' rooms, as well as improvements to corridors and restroom facilities at the head office. In addition, the implementation of a full (100%) work-from-office policy and the fact that most customers conducted their transactions directly at the Bank also contributed to increased usage of the Bank's restroom facilities. The water consumption is presented as follows.

**Tabel Penggunaan Air**  
Table of Water Usage

(Dalam m<sup>3</sup> / In m<sup>3</sup>)

Jenis Air Types of Water	2025	2024	2023
Air PDAM PDAM Water	35.093	30.722	27.341

Seluruh air yang digunakan oleh Bank Jatim langsung dialirkan ke saluran kota. Bank Jatim belum melakukan daur ulang air.

All water used by Bank Jatim is discharged directly into the city's drainage system. Bank Jatim does not recycle its water.

## Aspek Keanekaragaman Hayati

### Dampak dari Wilayah Operasional yang Dekat atau Berada di Daerah Konservasi atau Memiliki Keanekaragaman Hayati dan Usaha Konservasi Keanekaragaman Hayati

[OJK F.9, F.10]

Sampai dengan akhir tahun 2025, seluruh wilayah operasional Bank Jatim tidak berada di sekitar kawasan lindung maupun kawasan yang memiliki nilai keanekaragaman hayati tinggi. Dengan demikian, kegiatan operasional Bank Jatim tidak menimbulkan dampak negatif terhadap keanekaragaman hayati.

Namun, Bank Jatim tetap berkomitmen untuk memberikan kontribusi positif dengan berperan aktif dalam upaya pelestarian keanekaragaman hayati. Pelestarian keanekaragaman hayati yang dilakukan selama tahun 2025 meliputi Rehabilitasi hutan, Penyulaman Taman Depan Museum BI di Jln Diponegoro Surabaya, dan Bantuan pengadaan tanaman hias dan pohon kelapa. Biaya pelestarian keanekaragaman hayati di tahun 2025 yaitu sebesar Rp568.604.000.

## Aspek Emisi

### Jumlah dan Intensitas Emisi yang Dihasilkan Berdasarkan Jenisnya

[OJK F.11, GRI 305-1, 305-2, 305-3, 305-4, FN-CB-410b.1, FN-CB-410b.2, FN-CB-410b.3, FN-CB-410b.4]

Atas penggunaan energi sebagai penunjang aktivitas operasional Bank, tentunya berdampak pada emisi yang dihasilkan, baik emisi GRK cakupan 1, cakupan 2 maupun cakupan 3. Bank Jatim telah mengukur masing-masing cakupan emisi GRK yang dihasilkan sepanjang tahun 2025. Namun demikian, Bank Jatim belum melakukan pengukuran emisi GRK cakupan 1, cakupan 2, maupun cakupan 3 yang berasal dari CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, dan NF<sub>3</sub>. Pada tahun 2024, Bank Jatim telah menetapkan *baseyear* yaitu tahun 2024 dan emisi yang dihasilkan sebagai *baseline* karena tahun 2024 Bank telah memiliki data yang lebih komprehensif, konsisten, dan terdokumentasi dengan baik sehingga dapat digunakan sebagai dasar yang andal untuk melakukan pengukuran, pemantauan, dan evaluasi kinerja pada periode-periode berikutnya. Tidak terdapat perubahan signifikan yang memicu penghitungan ulang emisi tahun dasar baik emisi cakupan 1, cakupan 2, maupun cakupan 3.

Penggunaan BBM sebagai penunjang kendaraan dan operasional genset termasuk ke dalam kategori emisi GRK cakupan 1. Pendekatan konsolidasi yang digunakan adalah kontrol operasional, mencakup seluruh fasilitas dan aktivitas yang berada di bawah kendali operasional Bank Jatim. Dalam menghitung emisi GRK (Cakupan 1) langsung, Bank Jatim menggunakan

## Aspect of Biodiversity

### Impacts from Operational Areas That Are Near or Located In Conservation Areas or Have Biodiversity

[OJK F.9, F.10]

Until the end of 2025, Bank Jatim's operational area is not adjacent to protected areas and areas with high biodiversity value. Therefore, Bank Jatim's operational activities do not have a negative impact on biodiversity.

However, Bank Jatim remains committed to making a positive contribution by actively participating in efforts to preserve biodiversity. Biodiversity conservation initiatives carried out in 2025 include forest rehabilitation, replanting and maintenance of vegetation in park areas, Replanting of the front garden of the Bank Indonesia Museum in Jln Diponegoro Surabaya, Assistance for the procurement of ornamental plants and coconut trees. The biodiversity conservation cost in 2025 amounted to IDR 568,604,000.

## Emission Aspect

### Number and Intensity of Emissions Generated by Type

[OJK F.11, GRI 305-1, 305-2, 305-3, 305-4, FN-CB-410b.1, FN-CB-410b.2, FN-CB-410b.3, FN-CB-410b.4]

The use of energy to support the Bank's operational activities certainly has an impact on the emissions generated, including Scope 1, Scope 2, and Scope 3 GHG emissions. Bank Jatim has measured each scope of GHG emissions generated throughout 2025. However, Bank Jatim has not yet measured Scope 1, Scope 2, and Scope 3 GHG emissions originating from CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O, HFCs, PFCs, SF<sub>6</sub>, and NF<sub>3</sub>. In 2024, Bank Jatim established 2024 as its baseline year, with the greenhouse gas (GHG) emissions generated during the year serving as the baseline for performance measurement. The Bank selected 2024 as the baseline year because it had more comprehensive, consistent, and well-documented data, providing a reliable basis for measuring, monitoring, and evaluating performance in subsequent reporting periods. There were no significant changes that triggered a recalculation of the base year emissions for Scope 1, Scope 2, or Scope 3.

The use of fuel to support vehicles and generator operations is included in the category of GHG emissions scope 1. In calculating direct GHG emissions (Scope 1), Bank Jatim uses the method used in Indonesia and non-Annex 1 countries (developing countries) which is Tier-1, namely based on energy consumption data multiplied by the

Selanjutnya, emisi GRK (Cakupan 2) tidak langsung yang bersumber dari penggunaan energi listrik. Perhitungan dilakukan dengan mengalikan konsumsi listrik (dalam Kwh per tahun) dengan average grid emission factor yang dikeluarkan Kementerian ESDM merujuk RUPTL PLN 2015-2024 yaitu sebesar 0,934 kgCO<sub>2</sub>/Kwh (2017) sebagai berikut.

Furthermore, indirect GHG emissions (Scope 2) originating from the use of electrical energy. The calculation is done by multiplying the electricity consumption (in Kwh per year) by the average grid emission factor issued by the Ministry of Energy and Mineral Resources referring to the 2015-2024 PLN RUPTL, which is 0.934 kgCO<sub>2</sub>/Kwh (2017) as follows.

Sementara itu, Bank Jatim juga menghitung emisi GRK (cakupan 3) tidak langsung lainnya yang berasal dari perjalanan dinas yang menggunakan pesawat terbang yang dilakukan oleh karyawan Bank Jatim. Perhitungan tersebut menggunakan kalkulator karbon ICAO (International Civil Aviation Organization/Asosiasi Penerbangan Sipil Internasional). Perhitungan emisi GRK (cakupan 3) tidak langsung lainnya yaitu berdasarkan kelas kabin dan jarak antara bandara keberangkatan dengan bandara kedatangan.

Meanwhile, Bank Jatim also calculated other indirect GHG emissions (scope 3) originating from business trips using airplanes carried out by Bank Jatim employees. This calculation used the ICAO (International Civil Aviation Organization) carbon calculator. Another indirect calculation of GHG emissions (scope 3) was based on cabin class and the distance between the departure airport and the arrival airport.

Pada tahun 2025, Bank Jatim telah melaksanakan pengukuran emisi yang bersumber dari aktivitas nasabah pembiayaan melalui sistem Credit Risk Management System (CRMS). Pendekatan yang digunakan dalam proses penghitungan emisi nasabah pembiayaan mengacu pada estimasi emisi gas rumah kaca (GRK) yang mencakup cakupan 1 dan cakupan 2 Data dan informasi yang digunakan dalam pengukuran tersebut disesuaikan dengan ketersediaan data berdasarkan klasifikasi Tier 4.

Perhitungan nilai emisi GRK dilakukan dengan pendekatan proporsional, yaitu dengan membandingkan jumlah aset pembiayaan nasabah pada masing-masing sektor ekonomi terhadap total aset nasabah yang tercatat di bursa efek sesuai dengan sektor usahanya, serta terhadap total aset pembiayaan nasabah di Bank. Adapun besaran emisi GRK yang dibiayai ditentukan dengan mengalikan total emisi GRK dari setiap cakupan dengan proporsi *outstanding* pembiayaan dibandingkan dengan total aset nasabah di Bank.

Adapun emisi debitur yang telah dihitung sebagai berikut.

In 2025, Bank Jatim conducted emissions measurement derived from customer financing activities through the Credit Risk Management System (CRMS). The approach used in calculating emissions from financed customers refers to the estimation of greenhouse gas (GHG) emissions, covering Scope 1 and Scope 2. The data and information used in this measurement are adjusted based on data availability according to Tier 4 classifications.

The calculation of GHG emission values is carried out using a proportional approach, by comparing the amount of customer financing assets in each economic sector to the total customer assets listed on the stock exchange according to their business sector, as well as to the total customer financing assets within the Bank. The financed GHG emissions are determined by multiplying the total GHG emissions from each scope by the proportion of outstanding financing relative to the total customer assets held at the Bank.

The calculated emissions attributable to borrowers are as follows.

### Upaya dan Pencapaian Pengurangan Emisi yang Dilakukan [OJK F.12, GRI 305-5]

Bank Jatim berkomitmen untuk secara berkelanjutan melakukan berbagai upaya dalam menurunkan emisi gas rumah kaca yang dihasilkan dari seluruh aktivitas operasional dan kegiatan bisnisnya. Komitmen tersebut didasari oleh kesadaran Bank Jatim bahwa emisi gas rumah kaca yang dihasilkan berpotensi memberikan kontribusi terhadap dampak lingkungan yang merugikan, antara lain perubahan iklim dan peningkatan suhu global. Dalam rangka mengurangi emisi yang dihasilkan, Bank Jatim menerapkan sejumlah langkah efisiensi, antara lain penghematan penggunaan lampu, pengaturan intensitas pencahayaan di ruang kerja kantor dan gedung, penerapan kebijakan mematikan pendingin ruangan (AC) setelah jam operasional berakhir, serta pelaksanaan pemeliharaan AC secara berkala. Selain itu, Bank Jatim juga melakukan penggantian lampu konvensional dengan lampu LED yang lebih hemat energi, serta memanfaatkan teknologi informasi untuk pelaksanaan rapat sebagai alternatif yang bertujuan mengurangi emisi yang timbul dari penggunaan bahan bakar minyak. Upaya Bank Jatim dalam mengurangi emisi yang dihasilkan sejalan dengan upaya Bank Jatim dalam melakukan efisiensi penggunaan energi seperti yang disampaikan pada bagian Aspek Energi dalam Laporan Keberlanjutan ini. Pada tahun 2024, Bank Jatim telah menetapkan *baseyear* yaitu tahun 2024 dan emisi yang dihasilkan sebagai *baseline* yang bertujuan untuk mengukur efektivitas upaya efisiensi penggunaan energi. Pengurangan emisi GRK diukur dengan membandingkan emisi GRK yang dihasilkan di tahun 2024 dengan tahun berjalan. Perhitungan emisi GRK diukur melalui penggunaan listrik, BBM, dan perjalanan dinas sebagaimana telah disampaikan pada bagian Jumlah dan Intensitas Emisi yang Dihasilkan Berdasarkan Jenisnya.

Sepanjang tahun 2025, Bank Jatim berhasil menurunkan emisi GRK cakupan 1 menjadi sebesar 337,66 Ton Co2-eq menurun dibandingkan tahun 2024 yang sebesar 342,34 Ton Co2-eq. Bank Jatim juga berhasil menurunkan emisi GRK cakupan 2

### Efforts and Achievements of Emission Reduction Done [OJK F.12, GRI 305-5]

Bank Jatim is committed to continuously undertaking various efforts to reduce greenhouse gas (GHG) emissions generated from all of its operational activities and business operations. This commitment is based on the Bank's awareness that the emissions produced have the potential to contribute to adverse environmental impacts, including climate change and global warming. In order to reduce emissions, Bank Jatim has implemented several efficiency measures, including reducing the use of lighting, regulating lighting intensity in office workspaces and buildings, enforcing policies to turn off air conditioning (AC) after operational hours, and conducting regular maintenance of AC systems. In addition, Bank Jatim has replaced conventional lighting with more energy-efficient LED lamps and leveraged information technology for meetings as an alternative to reduce emissions resulting from fuel consumption. Bank Jatim's efforts to reduce emissions are aligned with its initiatives to improve energy efficiency, as outlined in the Energy Aspect section of this Sustainability Report. Bank Jatim established 2024 as its baseline year, with the GHG emissions generated during the year serving as the baseline against which the effectiveness of energy efficiency efforts is evaluated. Reductions in GHG emissions are measured by comparing emissions generated in the current reporting year with those recorded in the 2024 baseline year. GHG emissions are calculated based on electricity consumption, fuel consumption, and business travel, as presented in the Number and Intensity of Emissions by Type section of this Sustainability Report.

Throughout 2025, Bank Jatim successfully reduced its Scope 1 GHG emissions to 337.66 tons of CO<sub>2</sub>-eq, a decrease compared to 342.34 tons of CO<sub>2</sub>-eq in 2024. Bank Jatim also reduced its Scope 2 GHG emissions to 2,329.92 tons of CO<sub>2</sub>-eq, down from

menjadi sebesar 2.329,92 Ton Co<sub>2</sub>-eq menurun dibandingkan tahun 2024 yang sebesar 2.579,84 Ton Co<sub>2</sub>-eq. selain itu, *outcome* dari upaya reduksi emisi yang dilakukan yaitu Bank Jatim berhasil menurunkan intensitas emisi GRK menjadi sebesar 0,28 Ton Co<sub>2</sub>-eq/Miliar Rupiah menurun dibandingkan tahun 2025 yang sebesar 0,37 Ton Co<sub>2</sub>-eq/Miliar Rupiah atau sebesar 24,32%.

Dalam rangka mendukung implementasi Keuangan Berkelanjutan sekaligus mendorong peningkatan inklusi keuangan nasional, Bank mengembangkan layanan Inbound Jconnect Remittance yang ditujukan untuk memfasilitasi pengiriman dana dari Pekerja Migran Indonesia (PMI) kepada keluarga di dalam negeri secara aman, cepat, dan terjangkau. Saat ini, layanan Inbound Jconnect Remittance telah memiliki dua koridor penerimaan, yaitu Koridor Malaysia melalui kerja sama dengan *Merchantrade Asia* (MTA) dan Koridor Hongkong melalui kerja sama dengan Chandra Remittance (PT Apikko Indonesia). Layanan tersebut dikembangkan sebagai wujud kontribusi Bank terhadap aspek sosial, khususnya dalam mendukung kesejahteraan keluarga PMI, memperkuat ketahanan ekonomi rumah tangga, serta meningkatkan literasi dan inklusi keuangan bagi masyarakat penerima dana remitansi. Pengembangan layanan dilakukan melalui sejumlah pendekatan strategis sebagai berikut.

#### 1. Aksesibilitas dan Inklusivitas

- Pengirim dana di luar negeri dapat melakukan transaksi melalui aplikasi yang disediakan oleh *Money Transfer Operator* (MTO) atau secara langsung di counter MTO. Dana yang diterima oleh penerima akan secara otomatis dikonversi ke dalam mata uang Rupiah (IDR).
- Integrasi dengan MTO di negara penempatan utama PMI.

#### 2. Efisiensi Biaya dan Transparansi

Layanan Inbound Jconnect Remittance menerapkan struktur biaya yang kompetitif dan transparan. Bank juga mengoptimalkan penggunaan sistem pembayaran internasional untuk mempercepat proses penyelesaian transaksi (*settlement*) serta menekan biaya transfer melalui pemanfaatan mata uang lokal.

#### 3. Peningkatan Literasi dan Pemberdayaan Keuangan

Bank memberikan edukasi kepada PMI, Calon PMI (CPMI), maupun keluarga PMI terkait pengelolaan dana remitansi, perencanaan keuangan, serta akses terhadap produk tabungan dan pembiayaan produktif. Upaya ini diperkuat melalui sinergi dengan program UMKM dan pembiayaan mikro guna mendorong pemanfaatan dana remitansi untuk kegiatan ekonomi yang produktif.

### Innovation and Development of Sustainable Development Products/ Services [OJK F.26]

In order to support the implementation of Sustainable Finance while encouraging increased national financial inclusion, the Bank developed the Inbound Jconnect Remittance service aimed at facilitating the transfer of funds from Indonesian Migrant Workers (PMI) to their families domestically in a safe, fast, and affordable manner. Currently, the Inbound Jconnect Remittance service has two receiving corridors, namely the Malaysia Corridor through a collaboration with *Merchantrade Asia* (MTA) and the Hong Kong Corridor through a collaboration with Chandra Remittance (PT Apikko Indonesia). The service was developed as a manifestation of the Bank's contribution to social aspects, particularly in supporting the welfare of PMI families, strengthening household economic resilience, and increasing financial literacy and inclusion for remittance recipients. Service development is carried out through a number of strategic approaches as follows.

#### 1. Accessibility and Inclusivity

- The bank provides a fund receiving service through Jconnect Remittance which allows funds to be forwarded to Bank Jatim accounts or other banks in real time.
- Overseas senders can make transactions through an application provided by a Money Transfer Operator (MTO) or in person at an MTO counter. Funds received by the recipient will be automatically converted into Indonesian Rupiah (IDR).
- Integration with MTO in the main PMI placement countries.

#### 2. Cost Efficiency and Transparency

Jconnect's Inbound Remittance service implements a competitive and transparent fee structure. The bank also optimizes the use of international payment systems to expedite settlements and reduce transfer costs by utilizing local currencies.

#### 3. Improving Financial Literacy and Empowerment

The bank provides education to migrant workers (PMI), prospective PMI (CPMI), and their families regarding remittance management, financial planning, and access to savings and productive financing products. These efforts are strengthened through synergies with MSME and microfinance programs to encourage the use of remittance funds for productive economic activities.

#### 4. Penguatan Tata Kelola dan Manajemen Risiko

Dalam pengelolaannya, Bank menerapkan proses *screening* transaksi untuk memastikan kepatuhan terhadap ketentuan APU-PPT dan sanksi internasional. Selain itu, Bank melakukan evaluasi secara berkala terhadap negara tujuan dan mitra koresponden guna memastikan kepatuhan terhadap regulasi yang berlaku.

Melalui pengembangan layanan *inbound remittance* yang berkelanjutan ini, Bank tidak hanya berperan sebagai penyedia jasa transfer dana, tetapi juga berkontribusi dalam pembangunan ekonomi berbasis keluarga PMI, khususnya di wilayah Jawa Timur yang merupakan provinsi dengan jumlah penempatan PMI terbesar di Indonesia. Layanan ini diharapkan dapat meningkatkan volume Dana Pihak Ketiga (DPK) yang berkualitas dari segmen remitansi, memperluas basis nasabah ritel, mendukung stabilitas ekonomi daerah di Jawa Timur dengan kantong PMI terbesar, serta berkontribusi terhadap pencapaian target inklusi keuangan nasional. In its management, the Bank implements a transaction screening process to ensure compliance with AML-CFT provisions and international sanctions. Furthermore, the Bank conducts regular evaluations of destination countries and correspondent partners to ensure compliance with applicable regulations.

Through the development of sustainable inbound remittance services, the Bank not only acts as a fund transfer service provider but also contributes to the development of a family-based economy for migrant workers (PMI), particularly in East Java, the province with the largest number of PMI placements in Indonesia. This service is expected to increase the volume of high-quality Third Party Funds (TPF) from the remittance segment, expand the retail customer base, and support regional economic stability in East Java, which has the largest pool of migrant workers (PMI), and contribute to the achievement of national financial inclusion targets. ### 1. Dampak Ekonomi

Layanan ini berperan dalam meningkatkan ketahanan ekonomi rumah tangga, di mana dana remitansi yang diterima keluarga PMI menjadi sumber pendapatan yang relatif stabil dan membantu mengurangi ketergantungan terhadap bantuan sosial maupun pembiayaan konsumtif. Selain itu, remitansi turut mendorong peningkatan literasi dan inklusi keuangan, karena penerima dana terdorong untuk membuka rekening bank, memanfaatkan layanan perbankan digital, serta mengakses produk keuangan lainnya. Dana remitansi juga berkontribusi dalam meningkatkan aktivitas ekonomi lokal, antara lain melalui pemanfaatannya untuk pengembangan UMKM, pembiayaan pendidikan, perbaikan hunian yang layak, hingga investasi produktif, yang pada akhirnya mendorong pertumbuhan ekonomi di wilayah Jawa Timur.

### 2. Dampak Sosial

Dari sisi sosial, remitansi berkontribusi pada peningkatan kesejahteraan dan kualitas hidup keluarga PMI melalui akses yang lebih baik terhadap pendidikan dan layanan kesehatan. Keberadaan sumber pendapatan yang stabil juga berperan dalam menurunkan tingkat kemiskinan. Di samping itu, layanan ini turut mendukung pemberdayaan perempuan, mengingat sebagian besar PMI merupakan perempuan yang memperoleh kesempatan kerja dengan penghasilan yang layak.

In addition, the *Jconnect Remittance* service has also undergone a penetration testing process carried out by the Chief Information Security Officer (CISO) Division. This testing aims to ensure the application is secure from various potential cyber threats, such as hacking, data theft, and other forms of digital attacks, before being used by customers. ### 1. Economic Impact

This service plays a role in improving household economic resilience, as remittances received by migrant workers (PMI) families provide a relatively stable source of income and help reduce dependence on social assistance and consumer financing. Furthermore, remittances contribute to increased financial literacy and inclusion, as recipients are encouraged to open bank accounts, utilize digital banking services, and access other financial products. Remittances also contribute to increasing local economic activity, including through their use for MSME development, education financing, housing improvements, and productive investments, ultimately driving economic growth in East Java.

### 2. Social Impact

From a social perspective, remittances contribute to improving the welfare and quality of life of migrant workers' families through better access to education and healthcare. A stable source of income also plays a role in reducing poverty. Furthermore, this service supports women's empowerment, as the majority of migrant workers are women who have access to employment opportunities with decent wages.

### 3. Dampak Tata Kelola

Dari aspek tata kelola, penggunaan sistem dan dashboard internal dalam pengelolaan remitansi mendorong transparansi arus dana, memperkuat pengawasan transaksi, serta mendukung stabilitas sistem keuangan.

Dampak negatif *Inbound Jconnect Remittance* terhadap keuangan berkelanjutan antara lain:

#### 1. Risiko Ekonomi

Dana remitansi berpotensi digunakan untuk kebutuhan konsumtif jangka pendek, sehingga menimbulkan ketergantungan konsumtif. Ketergantungan terhadap remitansi juga dapat berisiko menurunkan produktivitas anggota keluarga penerima.

#### 2. Risiko Sosial

Dari sisi sosial, perbedaan tingkat kesejahteraan antara rumah tangga penerima dan non-penerima remitansi dapat memicu ketimpangan sosial. Selain itu, ketidakhadiran anggota keluarga yang bekerja sebagai PMI berpotensi memengaruhi struktur dan dinamika sosial dalam keluarga.

#### 3. Risiko Tata Kelola dan Lingkungan

Terdapat pula risiko penyalahgunaan dana remitansi untuk kebutuhan konsumtif berlebihan atau aktivitas ilegal, serta potensi penggunaan dana untuk kegiatan usaha yang tidak memperhatikan aspek lingkungan.

Untuk meminimalkan potensi dampak negatif tersebut, Bank Jatim melakukan berbagai upaya mitigasi, antara lain dengan mengembangkan produk turunan berbasis remitansi seperti tabungan dan pembiayaan UMKM berbasis remitansi. Bank juga secara berkelanjutan memberikan edukasi literasi keuangan kepada PMI, CPMI, dan keluarga PMI, termasuk pelatihan kewirausahaan serta pemahaman mengenai pemanfaatan dana remitansi untuk kegiatan usaha yang produktif dan ramah lingkungan.

Secara keseluruhan, layanan inbound remittance memiliki potensi yang signifikan sebagai katalis Keuangan Berkelanjutan dalam meningkatkan inklusi keuangan dan kesejahteraan sosial. Namun, tanpa tata kelola dan edukasi yang memadai, layanan ini juga dapat memicu ketergantungan konsumtif, risiko sosial, dan potensi penyalahgunaan dana. Melalui penguatan literasi keuangan, inovasi produk berbasis remitansi, serta pengawasan transaksi yang prudent, potensi dampak negatif dapat ditekan sehingga remitansi tidak hanya menjadi aliran dana konsumtif, tetapi juga bertransformasi menjadi instrumen pembangunan ekonomi yang berkelanjutan.

## Jumlah Produk yang Ditarik Kembali

[OJK F.29]

Selama tahun 2025, tidak terdapat produk yang ditarik kembali oleh Bank Jatim. Seluruh produk dan layanan yang ditawarkan telah memenuhi ketentuan yang berlaku dan dapat beroperasi secara berkelanjutan, sehingga tidak terdapat alasan yang mendasari penarikan produk maupun layanan pada periode tersebut.

### 3. Governance Impact

From a governance perspective, the use of internal systems and dashboards in remittance management promotes transparency in cash flows, strengthens transaction oversight, and supports financial system stability.

The negative impacts of Inbound Jconnect Remittance on sustainable finance include:

#### 1. Economic Risk

Remittance funds have the potential to be used for short-term consumption needs, thus creating consumer dependency. This dependence on remittances can also risk reducing the productivity of recipient family members.

#### 2. Social Risk

From a social perspective, differences in welfare levels between remittance-receiving and non-receiving households can trigger social inequality. Furthermore, the absence of family members working as migrant workers has the potential to impact the social structure and dynamics within the family.

#### 3. Governance and Environmental Risks

There is also the risk of misuse of remittance funds for excessive consumption needs or illegal activities, as well as the potential use of funds for business activities that do not pay attention to environmental aspects.

To minimize these potential negative impacts, Bank Jatim has implemented various mitigation efforts, including developing remittance-based derivative products such as savings and remittance-based MSME financing. The bank also continuously provides financial literacy education to Indonesian migrant workers (PMI), Indonesian migrant workers (CPMI), and their families, including entrepreneurship training and an understanding of how to utilize remittance funds for productive and environmentally friendly business activities.

Overall, inbound remittance services have significant potential as a catalyst for Sustainable Finance in increasing financial inclusion and social welfare. However, without adequate governance and education, this service may also lead to consumer dependency, social risks, and potential misuse of funds. Through strengthening financial literacy, innovating remittance-based products, and prudent transaction monitoring, potential negative impacts can be mitigated so that remittances become not merely a consumptive flow of funds but also an instrument for sustainable economic development.

## Number of Products Recalled

[OJK F.29]

Throughout 2025, Bank Jatim did not recall any products. All products and services offered met applicable regulations and were able to operate sustainably, so there was no basis for any product or service recalls during that period.

## Survei Kepuasan Nasabah Terhadap Produk dan/atau Jasa [OJK F.30]

Survei kepuasan nasabah merupakan salah satu instrumen yang dimanfaatkan oleh Bank Jatim untuk mengukur kualitas produk dan layanan yang diberikan, sekaligus sebagai sarana evaluasi atas kinerja Bank secara keseluruhan. Bank Jatim melaksanakan survei kepuasan nasabah secara berkala sebagai bagian dari komitmen dalam menjaga dan meningkatkan mutu pelayanan. Melalui pelaksanaan survei tersebut, Bank Jatim memperoleh berbagai masukan dan umpan balik dari responden yang selanjutnya dijadikan dasar dalam melakukan perbaikan serta penyempurnaan kualitas layanan agar semakin selaras dengan harapan nasabah. Selain berfungsi sebagai alat evaluasi, survei kepuasan nasabah juga memberikan wawasan strategis yang bernilai bagi Bank dalam merumuskan dan menyusun strategi yang lebih tepat sasaran untuk memenuhi kebutuhan nasabah, sekaligus memperkuat dan meningkatkan tingkat loyalitas nasabah terhadap Bank.

Tahun 2025, Bank Jatim melakukan Survei Kepuasan Nasabah & Net Promoter Score (NPS) yang dilakukan oleh pihak eksternal dengan responden sebanyak 1.350 responden dengan kriteria responden nasabah pegawai ASN, nasabah karyawan swasta, nasabah prioritas, nasabah Gen Z (usia 17-28 tahun), nasabah ibu rumah tangga, nasabah UMKM, Retail & Korporasi dan non nasabah Bank Jatim. Hasil skor Survei Kepuasan Nasabah Tahun 2025 mengalami penurunan dibanding tahun 2024 dikarenakan beberapa hal sebagai berikut :

- Menggunakan vendor yang berbeda
- Penambahan jumlah responden (1.350 responden)
- Kriteria responden yang bertambah yaitu nasabah pegawai ASN, nasabah karyawan swasta, nasabah prioritas, nasabah Gen Z (usia 17-28 tahun), nasabah ibu rumah tangga, nasabah UMKM, Retail & Korporasi serta non nasabah Bank Jatim
- Masukan responden kategori Karyawan Swasta dan Gen Z menjadi perhatian dalam meningkatkan promosi dan pengembangan fitur-fitur mobile banking yang sesuai dengan kebutuhan nasabah, sehingga tercipta customer experience yang akan mempengaruhi loyalitas nasabah.

## Customer Satisfaction Survey With Products and/or Services [OJK F.30]

The customer satisfaction survey is one of the instruments used by Bank Jatim to measure the quality of the products and services provided, as well as a means of evaluating the Bank's overall performance. Bank Jatim conducts customer satisfaction surveys periodically as part of its commitment to maintaining and improving service quality. Through the implementation of these surveys, Bank Jatim obtains various input and feedback from respondents which is then used as a basis for improving and enhancing service quality to be more aligned with customer expectations. In addition to functioning as an evaluation tool, the customer satisfaction survey also provides valuable strategic insights for the Bank in formulating and developing more targeted strategies to meet customer needs, while strengthening and increasing customer loyalty to the Bank.

In 2025, Bank Jatim conducted a Customer Satisfaction Survey & Net Promoter Score (NPS) conducted by an external party with 1,350 respondents with the criteria of respondents being State Civil Apparatus (ASN) employee customers, private employee customers, priority customers, Gen Z customers (aged 17-28 years), housewife customers, MSME customers, Retail & Corporate and non-Bank Jatim customers. The results of the 2025 Customer Satisfaction Survey score decreased compared to 2024 due to several factors as follows:

- Using different vendors
- Increase in the number of respondents (1,350 respondents)
- The increasing respondent criteria are State Civil Apparatus (ASN) employee customers, private employee customers, priority customers, Gen Z customers (aged 17-28 years), housewife customers, MSME customers, Retail & Corporate customers and non-Bank Jatim customers.
- Input from respondents in the Private Employee and Gen Z categories is a concern in improving the promotion and development of mobile banking features that suit customer needs, thereby creating a customer experience that will influence customer loyalty.

We (PT Kharisma Integrasi Manajemen/KIM Consult) have been engaged by PT Bank Pembangunan Daerah Jawa Timur Tbk. (Bank Jatim) to perform an independent assurance engagement on the sustainability data and information presented in the Sustainability Report for the period ending December 31, 2025.

#### Competence and Independence

This engagement is carried out by an assurance team possessing professional capabilities and adequate technical expertise. The team consists of certified experts in the field of sustainability reporting to ensure the quality and integrity of the engagement's execution. The entire process is conducted independently without any conflicts of interest, as the team was not involved in the preparation of the main sections of the report.

#### Responsibilities

Bank Jatim's management has full responsibility for the presentation of information and statements in the report, including data related to targets, policies, and sustainability performance achievements. Meanwhile, our role is to provide assurance on this information and issue an independent opinion based on the approved terms of reference.

#### Assurance Standards and Criteria

This engagement was conducted in accordance with the AA1000 Assurance Standard (AA1000AS v3) from AccountAbility. The evaluation focused on the alignment of Bank Jatim's sustainability processes and framework with the principles of the AA1000AP (2018), namely inclusivity, materiality, responsiveness, and impact. Additionally, the assessment also considers the reporting principles in the GRI Standards, including aspects of accuracy, balance, and reliability of information.

#### Scope of Assurance

The engagement was designed to achieve a moderate level of assurance through the process of collecting and verifying evidence, in accordance with AA1000AS v3, including:

- 1) Assessment of Bank Jatim's compliance with AA1000 AP (2018); and
- 2) Assessment of the accuracy and quality of the sustainability performance information, related to the scope of the accepted GRI Standards as follows:
  - a) Engagement in Type 1 assurance, includes:

- Anti-Corruption Topic (GRI 205)
  - Energy Topic (GRI 302)
  - Emissions Topic (GRI 305)
  - Customer Privacy Topic (GRI 418)
- b) Engagement regarding Type 2 assurance on Economic Performance topic (GRI 201), includes:
- Direct economic value generated and distributed
  - Financial implications, risks, and other opportunities due to climate change
  - Obligations for defined benefit pension plans and other retirement plans
  - Financial assistance received from the Government

### Limitations

Moderate assurance is provided through review and verification at the management level. The scope of the engagement is limited to sustainability information for the period from January through December 2025. The engagement does not include an evaluation of historical data, audited financial information, or technical aspects outside the agreement.

### Methodology

The assignment is carried out through a series of procedures to assess the accuracy of certain specific statements and certain data sets presented in the report, as well as the systems and processes for managing and reporting them, as follows:

- 1) Identifying statements and data sets that are classified by relevant data ownership and the type of evidence required for the verification process.
- 2) Conducting interviews using Video Conference with management/the person in charge and data owners at Bank Jatim. The data verification process includes:
  - Ask questions regarding quantitative and qualitative aspects of the Report disclosures, including performance information, policies, procedures and underlying management systems.
  - Request evidence of data sources and explanations of relevant data collection and calculation methods to support figures and claims.
  - Verify claims made in the Report and confirming the evidence presented including calculation methods, criteria and assumptions with several data owners and other documentation from internal and external sources.
  - Cross-referencing between previous Sustainability Reports and the latest Report.
- 3) Reviewing the information that are collected and submitted feedback for immediate corrections, and as well as provide recommendations as necessary or for improving the content of future Reports.

### **Evaluation of Compliance with the Accountability Principle (AA1000AP)**

Conclusions regarding compliance with AA1000AP (2018) on Inclusivity, Materiality, Responsiveness, and Impact include the following findings:

#### **- Inclusivity**

Bank Jatim has engaged various stakeholders through focus group discussions (FGDs), questionnaires, routine communication, and involvement in the process of determining material topics, thereby reflecting a relatively comprehensive multi-stakeholder approach. However, this engagement remains consultative (receiving input) and has not yet fully demonstrated a significant influence on strategic decision-making or a clear mapping of stakeholder priorities.

#### **- Materiality**

Bank Jatim has identified material topics through a structured process that includes impact identification, significance analysis, and stakeholder engagement, thereby aligning conceptually with the principle of materiality. However, the disclosures do not yet fully demonstrate an explicit and trackable relationship between each stakeholder and the material topics, nor are they supported by a transparent methodology (criteria, weighting, and influence on strategic decisions), so the connection between stakeholder engagement and materiality outcomes remains general.

#### **- Responsiveness**

Bank Jatim has demonstrated responsive mechanisms through policies, programs, and systems such as whistleblowing, data protection, and continuous communication with stakeholders. However, there is no clear link between specific stakeholder feedback and the responses or actions taken, nor has concrete evidence been provided regarding the effectiveness of such follow-up actions.

#### **- Impact**

Bank Jatim has identified and managed economic, social, and environmental impacts, and linked them to relevant strategies and material topics. However, the disclosure of impacts remains general and dominated by positive narratives; it has not yet demonstrated quantitative measurements, specific impacts on each stakeholder, or a comprehensive analysis of long-term outcomes.

### **Evaluation of the Accuracy and Quality of Sustainability Information**

The report has presented sustainability information that is relevant to stakeholder needs and in accordance with GRI Standards. The level of data accuracy and reliability is considered adequate, supported by clear collection and calculation methods as well as complete documentation from

the data owners. The information presented demonstrates good consistency, supported by a structured data management system, making it verifiable.

### Conclusion

Based on the results of our engagement, we conclude that the information in the Sustainability Report has been presented fairly and reliably in all material respects within the defined scope. The key findings are presented in this report, while the details of our recommendations have been provided separately to management.
